INDIAN NAVAL & MARINE INDUSTRY

A CAPABILITY CATALOUGE

TECHNOLOGY | INNOVATION | STRENGTH

FOREWORD

1. The transformation of the Indian Navy into a true **"Builder's Navy"** is a testament to the resilience, maturity, and growing sophistication of our indigenous industrial base. As we navigate an era defined by rapid technological advancements and complex maritime security challenges, the synergy between the Navy, the Directorate General of Quality Assurance (DGQA), and our industry partners has evolved from a transactional relationship into a strategic partnership.

2. It is with immense pride that I introduce the **"Indian Naval & Marine Industry – A Capability Catalogue."** This document is far more than a directory; it is a **strategic blueprint** of India's maritime manufacturing ecosystem. Capturing the granular capabilities of **600 industry partners**, this compendium bridges the gap between operational requirements and industrial capacity. From agile MSMEs to large-scale defence conglomerates, it maps the backbone of our national drive toward *Atmanirbharta*.

3. To ensure this catalogue serves as a dynamic enabler for procurement and supply chain management, we have structured it for maximum utility:

- **Index 1:** A comprehensive alphabetical listing for rapid reference.
- **Index 2:** A capability-based mapping that links specific equipment to capable partners, designed to streamline vendor discovery and facilitate targeted procurement.
- **Index 3:** A dedicated focus on **Foundries—**recognising their role as the "mother industry" and the critical foundation of marine engineering.

4. Quality is the bedrock of self-reliance. As we release this document at the **North Zone QA-Industry Conclave 2026**, it stands as a symbol of our commitment to **"Traceability, Speed, and Trust."** It reflects the DQA(WP)'s resolve to replace information asymmetry with transparency, ensuring that the right capability is always within reach of the user.

5. I am confident that this compendium will serve as a critical **force multiplier** for the Indian Navy, Coast Guard, and procurement agencies. It is a vital step toward identifying, nurturing, and integrating the right partners as we sail toward the vision of a **Viksit Bharat by 2047**.

Air Control & Chemical Engineering Company Limited

Marine Business - Equipment / Services

- Air Conditioning Plants & HVAC
- AC & REF Compressors
- Semi Hermetic Compressor
- Refrigeration Plant
- Air Cooling Unit
- Spilt Ac
- Evaporative Condenser
- Shell & Tube Condenser
- Air Handling Unit (AHU)
- Air Treatment Unit (ATU)
- Heat Exchanger
- Sea Water Cooler
- Ventilation Fan

ACCEL, incorporated in 1961, is pioneer in field of AC, Refrigeration & Ventilation Equipment. ACCEL products are being used in Navy, Railways, Nuclear & Thermal Power Plants, Cold Storages, Ice, Cement & Steel Plants, Dairies & Pharmaceutical Industry. ACCEL has integrated manufacturing facility for Ref Compressors, Ref Equipment, Packaged Water / Brine Chillers, Industrial Fans & Blowers and Graded Castings with most manufacturing and testing facilities inhouse. ACCEL is enriched with world class technologies which are continuously augmented by its in-house R&D facility. Our products have built a reputation for their unmatched quality, easy maintenance, durability and reliability. ACCEL has gained global acceptance

Certifications : ISO 9001 : 2015

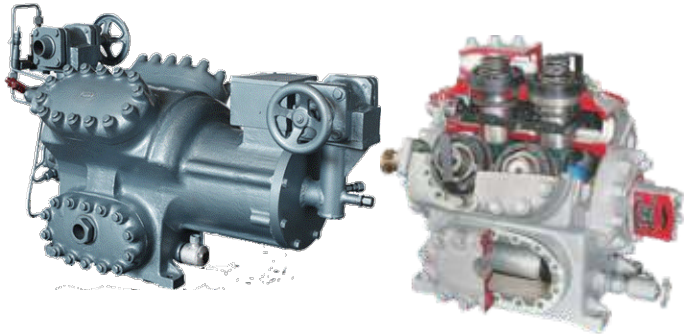
AC & REF COMPRESSORS

Characteristics -

- SMC series Reciprocating Compressors
- AC Plant Capacity from 5 TR to 300 TR
- Ref Plant Capacity from 1 TR to 150 TR
- Compatible with ecofriendly refrigerants like
- R-134a, R-407c, R-404a, Ammonia etc.

SEMI HERMETIC COMPRESSOR:

- Incorporates Motor and Compressor in Single Body
- Built on Proven SMC series platform
- Thermal overload protection
- Compatible with eco friendly refrigerants
- SH 4-65 installed on board P-15B,P-17A class of ships as Ref Plant Compressor.
- Type Tested as per IN requirementsBody of Nodular Cast Iron.



REFRIGERATION PLANTS FOR IN

- Capacity Range –Type Tested
- 1.25TR (KORA CLASS)
- 2.1 TR (P15B/P17A/SNF/P25)
- 3TR (NGOPV)
- 4 TR(P21/NOPV)
- 6 TR(DSV/MPV/CTS)

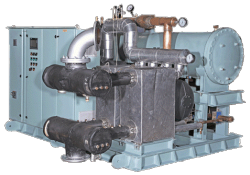
AIR HANDLING UNITS

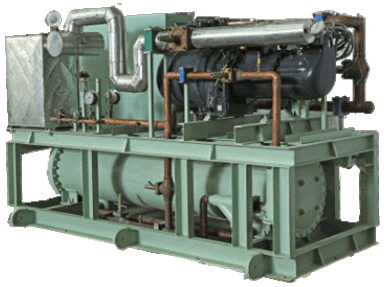
- Available in 12 different sizes and can be custom designed with fan and coil, filter.
- Flow rate up to 55,000 m3/hr.
- Standard tubes are copper tubes, Can be designed and delivered with Cu/Ni tubes with Aluminum Casing.

PACKAGE CHILLER UNITS (PWC TYPE):

80 TR PLANT (NOPV)200 TR (P15B)

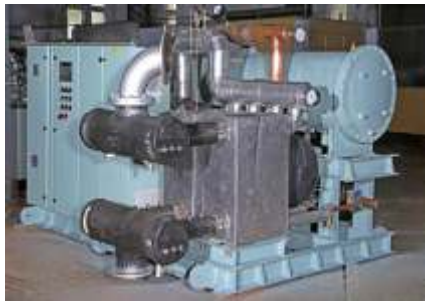
Factory Assembled and Tested Package from 5 TR to 300 TR requiring only water and electrical connection withchillers & condensers compliant and Type Tested as per IN Standards.





AC PLANTS FOR IN

- apacity Range –Type Tested
- 60 TR(ASW/FDN)
- 80 TR (OPV/NOPV)
- 140 TR (NGOPV)
- 144 TR (SVL/FDN)
- 200 TR (P15B)
- AC Plant for P15B Project
- 650kW/185 TR Largest Capacity Indigenous AC Plant Design, Manufactured & Commissioned by ACCEL



AIR TREATMENT UNITS

PACKAGE AC

- Available in Standard Sizes from 10TR to 40 TR
- Developed for DRDO complying to all MIL specification, First Package AC unit to be tested as per IS 8148
- Package AC's being developed for P-75I, Internal trials completed successfully.

Aegis Valves Industries Private Limited

Marine Business - Equipment / Services

- Marine Gate Valves,
- Globe Valves (SDNR & SDSL)
- Check Valves (NRVs),
- Ball Valves,
- Butterfly Valves,
- Storm Valves, Strainers

Aegis Valves Industries incorporated on 04 Sep 2015, is an Indian private limited company engaged in the design, manufacture and supply of industrial and marine valves. The company's registered office and manufacturing facility are located at Bakrol Bujrang, Ahmedabad, Gujarat, with an associated sister concern, Aegis Steel Cast, operating an in-house foundry at Kathwada GIDC, Ahmedabad. Aegis manufactures a comprehensive range of valves including Gate, Globe, Check/NRV, Ball, Butterfly, SDNR/SDSL, Storm Valves and Strainers, catering to critical applications. The company serves diverse sectors such as Oil & Gas, Petrochemicals, Power, Chemical, Fertilizer, Steel, Nuclear, Marine, Naval, Water and allied industries. Aegis possesses strong defence-related capabilities, including manufacturing of marine valves in critical ferrous and non-ferrous grades with 100% indigenous content, supported by in-house foundries, precision CNC/HMC machining, assembly and advanced testing facilities including radiography. The company is certified to ISO 9001, ISO 14001 and ISO 45001 standards and is approved by DQA (WP), EIL and IBR. Aegis has supplied to reputed organizations such as MDL, HSL, IOCL, HPCL, BPCL, EIL and TOYO, and is committed to supporting the Government of India's Atmanirbhar Bharat initiative through quality, reliability and self-reliance.

Certifications: DQA(WP), ISO 9001:2015,
ISO 14000:2015,
ISO 45001:2018, EIL Approval, IBR Approval

Marine Gate Valves

Aegis Valves Industries manufactures Marine Gate Valves for marine and naval applications in sizes from 15 NB to 350 NB, with pressure ratings PN 10 to PN 40 and Class 150 to 600. Valves are designed as per DME 463, NES 375, BS 5154, DIN EN 1171 and ANSI B16.34, with face-to-face dimensions as per EN 558 / DIN 3202. End connections include flanged, butt weld and screwed types. Inspection and testing are conducted as per DME 463 and EN 12266-1/2.

MARINE GLOBE VALVES – STRAIGHT TYPE [SDSL / SDNR]

Aegis Valves Industries Private Limited manufactures Marine Globe Valves (SDNR & SDSL) for marine and naval applications in sizes from 15 NB to 350 NB, with pressure classes PN 10 to PN 100 and ANSI Class 150 to 600. Valves are manufactured as per DME 463, NES 375 and BS 5154, with face-to-face dimensions as per BS EN 558. End connections include flanged, butt weld and screwed types. Inspection and testing are carried out as per DME 463 and BS EN 12266-1/2, with controlled face-to-face tolerances as per applicable standards.

MARINE GLOBE VALVES – ANGLE TYPE [SDSL / SDNR]

Aegis Valves Industries Private Limited manufactures Marine Angle Type Globe Valves for marine and naval applications in sizes from 15 NB to 350 NB, with pressure classes PN 10 to PN 100 and ANSI Class 150 to 600. Valves are designed as per DME 463, NES 375, BS 5154, DIN EN 1171 and ANSI B16.34, with face-to-face dimensions as per BS EN 558. End connections include flanged, butt weld and screwed types. Inspection and testing are carried out as per DME 463 and BS EN 12266-1/2, with controlled face-to-face tolerances as per applicable standards.

MARINE CHECK VALVES / NRV

Aegis Valves Industries Private Limited manufactures Marine Check Valves / NRVs for marine and naval applications in sizes from 50 NB to 350 NB, with pressure classes PN 10 to PN 40 and ANSI Class 150 to 600. Valves are manufactured in accordance with DME 463, NES 375, BS 5352 and BS 1868, with face-to-face dimensions as per BS EN 558. End connections include flanged, butt weld and screwed types. Inspection and testing are carried out as per DME 463 and BS EN 12266-1/2 to ensure dependable performance in marine service.

STORM VALVES

Aegis Valves Industries Private Limited manufactures Marine Storm Valves for marine and naval applications in sizes from 15 NB to 350 NB, with pressure classes PN 10 to PN 100 and ANSI Class 150 to 600. Valves are manufactured in accordance with DME 463, NES 375 and BS 5154, with face-to-face dimensions as per BS EN 558. End connections include flanged, butt weld and screwed types. Inspection and testing are conducted as per DME 463 and BS EN 12266-1/2 to ensure safe and reliable operation in marine service.

MARINE BALL VALVES

Aegis Valves Industries Private Limited manufactures Marine Ball Valves for marine and naval applications, designed for reliable isolation and flow control under demanding service conditions. The valves are manufactured in compliance with applicable marine and international standards and are suitable for flanged, butt weld and screwed end connections as per customer and system requirements. Inspection and testing are carried out in accordance with approved marine testing standards to ensure safety, tight shut-off and operational reliability.

MARINE BUTTERFLY VALVES

Aegis Valves Industries Private Limited manufactures Marine Butterfly Valves for marine and naval applications, suitable for isolation and flow regulation in shipboard and offshore systems. The valves are designed and manufactured in compliance with applicable marine and international standards and are offered with flanged and wafer-type end connections as per system requirements. Inspection and testing are conducted in accordance with approved standards to ensure dependable performance, tight shut-off and long service life in marine environments.

STRAINERS

Aegis Valves Industries Private Limited manufactures Strainers for marine and industrial pipeline applications handling gases and liquids, including suction and vacuum services. The strainers are designed for systems where limited solid particulate contamination is expected and where cleaning is infrequent. These are offered in various material options including duplex stainless steel and aluminium bronze, ensuring durability, corrosion resistance and reliable system protection.

AJAY VALVES PVT. LTD.

Marine Business - Equipment / Services

- VALVES (GATE, GLOBE, SDNR, ANGLE, STROM, BUTTERFLY, BALL, CHECK, ACTUATOR OPERATED VALVES, ETC.)
- CYLINDER HEAD ASSEMBLY FOR MFFS
- SPARES FOR VALVES
- HYDRAULIC FITTINGS
- STRAINERS
- MUD BOX
- STRUM BOX
- ROSE BOX
- SELF CLOSING DRAIN COCK
- GAUGE GLASS COCK
- SEMI ROTARY HAND PUMP
- WATER TIGHT DOORS
- WEATHER TIGHT DOORS
- WINDOWS
- SCUTTLES
- HATCHES
- FLANGES
- SOUNDING PLUG
- PANAM CHOCK, etc.

AJAY VALVES PVT LTD is a leading provider of high-quality valves and flow control solutions, dedicated to serving diverse industries such as Defense, Shipbuilding, Shipping, Oil and Gas, Water Treatment, Chemical Processing, HVAC, etc. With decades of experience, we pride ourselves on innovation, reliability, and exceptional customer service.

We have been manufacturing Marine & Industrial valves since last 5 decades.

Our Valves undergo rigorous testing and comply with international standards, ensuring durability and performance. We offer tailored solutions to meet specific client requirements, including size, materials, and actuation methods.

Our dedicated R&D team focuses on innovative designs and technologies to improve efficiency and address emerging industry challenges.

Certifications:AS9100D, ISO9001:2015, ISO 4001:2015, ISO45001:2018, ISO/IEC 17025: 2017 & ISO 27001:2013 certified, CEMILAC approved Design Organization for Airborne Equipment.

We manufactured Hull Valves (underwater) for P17A, SVL& Various other Prestigious Projects.

We have commenced development of Spares for valves to Submarines and have supplied various products to P75 Project, This venture is especially to develop critical and sophisticated Valves within India under MAKE IN INDIA.

Valves being tested for Helium Gas Leak Test

Application : Hydrogen Services
Testing :
Metallurgical Test
Radiography
DP Test
NDT Test
Helium Gas Leak Test
Hydro Test
Life Cycle Test
Vibration Test
Shock Test
Noise Test
Fire Safe Test

Valves Manufactured with following standards

NES 375
ASA
JIS
DIN
GOST
Tailor made as per clients specifications
Pressure Ranging :
150# to 2500#
Material :
NAB NES 747 Part II
NAB NES 833 Part II
GM BS 1400 LG4C
Bronze Grades
Cast Steel
Cast Iron
Ductile Iron
Stainless Steel
Duplex Steel
Inconel
Hastalloy, etc.

Castings manufactured with utmost precision in order to achieve HP Testing

Castings / Forgings being machined with due precision and tolerance as per design requirement

Water Tight / Weather Tight Doors, Windows, Hatches and other fabricated items are also manuafactured taking care of clients requirement and if require with inspection from classification societies.

We are offering our products for inspection to various classification societies, viz

QAE
IR Class
Bureau Veritas
ABS
Class NK
RINA
DNV
LR, etc.

Alfa Laval India Pvt. Ltd.

Marine Business - Equipment / Services

- **A GMU for certain models of Separators, Decanters and Sanitary Flow Equipment.**
- **Supplier of Plate and Spiral Exchangers, Centrifugal Separators, Decanters and Sanitary Flow Equipment.**
- **A global hub for executing Alfa Laval projects in Distillery and Vegetable Oil Refineries in South Africa, China, Nigeria, Middle East, Turkey, Russia and Bangladesh.**
- **Special expertise in process equipment fabrication in SS and other exotic metals.**

Alfa Laval India : Since 1937

- Corporate Office in Pune
- Global Hub for Centrifugal Separators, Decanters & Flow Equipment
- Service centers at Delhi, Vizag and Thane
- Global Core Components Facility at Satara
- Field Offices in 14 locations
- Manufacturing Units in Pune, and Satara
- ISO Certified for Manufacturing & After Sales Services.
- Supplier of high quality fabricated Process Equipment
- Special competencies in Drying and Evaporation technologies.

Certifications : ISO 9001:2015, ISO 14000 : 2015, etc

High Speed Separators(HSS)

HSS / centrifuge / purifier / clarifier for the following applications:

- Fuel Oil
- Lubricating Oil
- Hydraulic Oil
- Trolley mounted (Emmie)

Fresh Water Generators

- Available upto 1000 m3/day
- Low salinity
- Separate hot water loop
- (optional)

Heat Exchangers

- Gasketed Plate type
- Brazed heat exchanger
- Semi-welded heat changers

Ballast water treatment system

- UV technology

Flex / compact systems
Low power consumption

Boiler

- Oil fired boilers

Composite boilers
WHR units
TFO

Moatti filters

- Filters for :
- Fuel oil
- Lubricating oil
- Hydraulic oil

Oily Water Separator

- Capacities : 0.6,2.5, 5 m3/hr
- Centifugal separator
- Blue Box
- 15 ppm/ 5 ppm

OceanGlide – Fluidic Air Lubrication

- Reduced propulsion power

Reduced fuel consumption
Reduced CO2 and other emissions
Reduced marine noise

- Rubber Overmolded Connectors
- Marine Series connectors
- Fiber Optic Connectors
- Electro-Mechanical Connectors

Azad Engineering Limited:

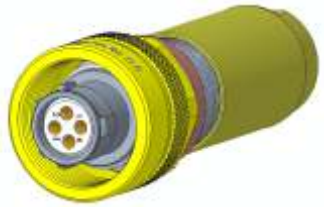
Amphenol FCI specializes in the design and manufacture of customized underwater connectors and pressure-tight cable termination solutions. We offer a wide range of connectors, tailored to meet specific customer requirements, pressure ratings, and application needs.

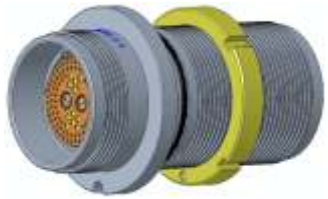
With strong engineering capabilities and in-house environmental testing facilities, Amphenol FCI ensures complete validation of products for performance, reliability, and durability under demanding underwater conditions. Our focus on customization, quality, and rigorous validation enables us to deliver dependable interconnect solutions for critical applications.

Certifications: ISO 9001:2015, `
ISO 14001:2015, IATF 16949

Marine Series Connectors

High performance Electrical, Dry mated sealedmultipin connector are suitable to withstand minimum 60 bar water pressure and can customized based on the customer requirement.





Sealed Leak Proof Connectors

Over Molded, Dry mated sealed multipin connector are suitable to withstand minimum 45 bar water pressure and

Electro-Mechanical Connectors

Connector offers a highly reliable electrical and load bearing mechanical connections in dynamic conditions

Electro Optic Connectors

Customised connectors can be pressure-tight terminated up to 60 bar using various techniques.

Pressure Tight Cable Harness

Customised connectors can be pressure-tight terminated up to 60 bar using various techniques.

Arcelor Mittal Nippon Steel India Pvt. Ltd.

Marine Business - Equipment / Services

- High strengthand tough steel-DMR 249A for hull structures for Warships
- Shipbuilding grades as per DNV, ABS, IRS, LR, NKK classification
- Rolled Homogenous Armour Steel and Ultra High Strength and hardnesssteel plates (DRDO developed)
- ARMAPRO500 - High Hardness Armour Steel Plates
- High Strength Ballistic Resistant Steel Plates as per MIL / InternationalSpecification
- High Strength Steel (690 QL1, 890QLand 960QL) for militaryequipment and gun applications

AM/NS India

- AM/NS India is the joint venture between ArcelorMittal and Nippon Steel – two of the world's leading steel companies. As an integrated steel manufacturer with ironmaking, steel-making and downstream facilities spread across India, we produce over 600 varieties of steel (Hot Rolled Steel, Cold Rolled Steel, Colour Coated, Galvanised Steel, Heavy Plates, & Welded Pipes) for a range of applications across industries. Our goal is to create smarter, more sustainable steels for India that empower its growth trajectory and enable brighter futures for all.

Certifications : ISO 50001:2018, ISO 45001:2018, ISO 14001:2015, IATF 16949:2016

OUR PLATE FACILITIES

- Heavy plates are rolled in thicknesses ranging from6 mm and 150 mm, with a maximum width of 4,900 mm and a maximum length of 25,000 mm. The maximum unit plate weight is 17 MT. The plates cater to various application segments including line pipes, boilers, pressure vessels, wind energy, yellow goods,shipbuilding, and defense.

NAVAL DEFENCE
- Warships
- Submarine
- Frigates
- Fleet support ships
- Coast Guard Vessels

LAND DEFENCE
- Main Battle Tank
- Artillery Guns
- Infantry combat vehicles
- Military Bridges

NAVY

- P15B (INS Visakhapatnam, Imphal, Mormugao, Surat)

ArcVac ForgeCast Pvt. Ltd

Marine Business - Equipment / Services

- Forging Quality Steel Ingot from 1 to 25 ton
- Forged & Machined – Bars, Shafts, Discs, Rings, Hubs, Hollow Axle, Forgings, Blocks, Wheels
- Max 5 ton single piece as per Customer's design & specification.

ArcVac Forge, established in 2003, spread across 22 acres, is a leading manufacturer of Open Die Forgings and forging-quality Steel Ingots in Eastern India, operating as a fully integrated, withdownstream forging operations, starting from EAF-route steel making with secondary refining and bottom-poured ingot casting, followed by open die forging, heat treatment, and machining. The facility is supported by an in-house NABL-accredited laboratory ensuring effective process control, inspection, and traceability.

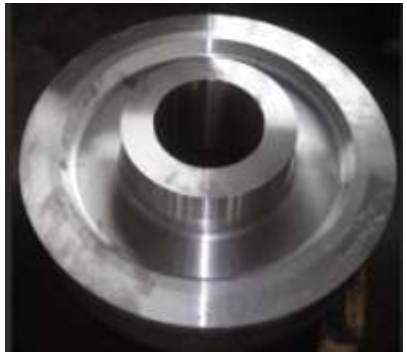
Certifications: ISO 9001:2015, ISO 14000 : 2015, ISO 14064, ISO 14067 & CBAM, TPG-PRI, ABS & Lloyds Marine Approvals, BIS and IBR Approvals

Forging Quality Steel Ingots

Forging Quality Steel Ingots
Electric Arc Furnace → Ladle Refining Furnace → Vacuum Degassing → Bottom poured Ingot
1 ton to 25 tons single piece
Maximum Heat Size: 25 tons

Arcvac supplies 15CDV6 grade high-strength alloy steel ingots and forgings for India's space missions, engineered to withstand extreme pressure and high temperatures while delivering exceptional strength, durability, and reliability. These properties are critical for structural integrity and safety in demanding aerospace and defence applications, particularly launch vehicle and load-bearing structures. Arcvac's materials are used in LVM3 (Launch Vehicle Mark 3), ISRO's heavy-lift launch vehicle forLEO and GTO missions and India's human spaceflight program, which has successfully supported Chandrayaan-2, Chandrayaan-3, and Gaganyaan test missions.

Arcvac supplies case-hardening and through-hardening steel shafts and gear blanks for naval applications, designed for use in propulsion systems and gearboxes. These components transmit power from gas turbines to propeller shafts under high torque and speed, while providing high wear resistance, toughness, and long service life in demanding marine environments. Arcvac's materials are used in the Nilgiri-class frigates (Project-17 Alpha) of the Indian Navy, stealth guided-missile warships built for blue-water operations and capable of air defence, anti-submarine warfare, and anti-surface combat.



Arcvac supplies 20X2H4A grade forged shafts and gear blanks for defence applications. These components provide a wear-resistant surface with a tough core, enabling them to withstand high torque and severe shock loads in transmission and final drive systems. Arcvac's products are used in Main Battle Tanks, specifically the T-90S "Bhishma", a frontline combat vehicle of the Indian Army designed for high firepower, protection, and mobility.

Arcvac supplies 15CDV6 steel for missile applications. This high-strength alloy is capable of withstanding extreme stress, pressure, and heat, ensuring structural integrity and safety during high-acceleration launch and flight, particularly in critical components such as motor casings and airframes. Arcvac's materials are used in missile systems including surface-to-air missiles for air defence against aircraft, drones, and incoming threats, as well as cruise missiles designed for long-range, low-altitude, high-precision strikes against ground and sea targets.

Ashoka Foundry & Equipment Private Limited

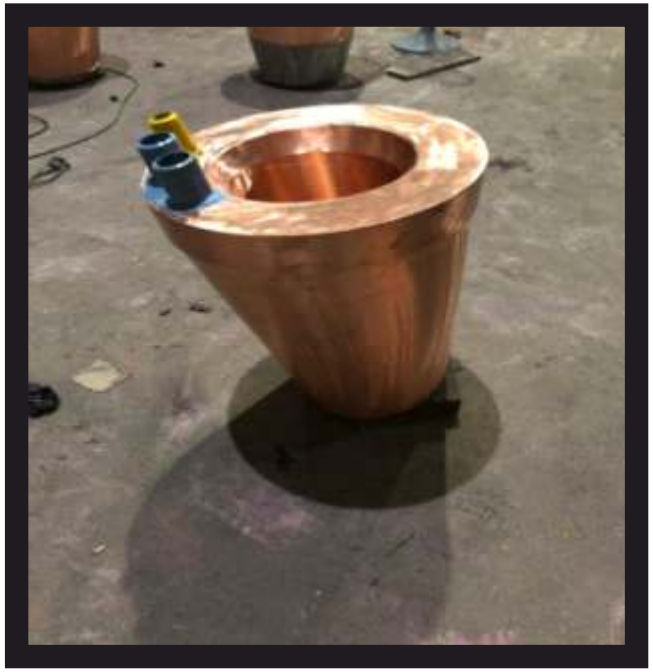
Ashoka Foundry & Equipment Private Limited is a 51-year-old, engineering and manufacturing company. , established with a strong vision of self-reliance and import substitution in critical industrial and strategic sectors. Over the last five decades, has developed, indigenised and supplied numerous import-substitute products, significantly reducing dependency on foreign suppliers and strengthening India's manufacturing ecosystem.

Our philosophy has been "Value Addition through Engineering Excellence." The company specializes in processing and value-addition of copper and copper-based alloys, transforming raw copper into high-performance, long-life engineered components.

The company is also engaged in exporting critical engineered products to overseas customers, thereby contributing to India's global manufacturing footprint.

Certifications : ISO 9001:2015

Copper Tuyere - Through which hot air is passed inside of blast furnace.



Copper High Current Line – Used to carry large electrical currents from transformers to the furnace.

Copper Panel - Used in Electric Arc Furnace

Marine Business - Equipment / Services

- MSS and UHF Satcom systems: For Ships, Submarines, Aircraft & Helios, Strategic Vehicles and Manpacks.
- MSS X'ponders: Periodic Position Reporting, Automatic Boundary Crossing Alerts, Emergency Weather Alerts, Navigational Assistance to pilots/Fishermen for Fishing Boats
- Software Defined Radios: For marine, land & airborne applications
- HF Communication: For long range communications using Skywave propagation
- Wind Profiler Radars: To provide three-dimensional atmospheric wind data which is very useful for studying the development of wind shears in near real time.

Avantel Limited, with more than three decades of leadership in strategic electronics and satellite communication systems in India, is focusing on indigenous solutions across a broad-spectrum including Defense Electronics, Satellite Communications, Software-Defined Radios and establishment of Ground Stations.

Avantel designed and developed various first of its kind, customized Wireless/ Satcom products and solutions to meet the special requirements of Indian Defense Services.

Avantel's unique value proposition is in integration of wireless, embedded firmware and software technologies to create innovative solutions.

Certifications: AS9100D, ISO9001:2015, ISO 4001:2015, ISO45001:2018, ISO/IEC 17025: 2017 & ISO 27001:2013 certified, CEMILAC approved Design Organization for Airborne Equipment.

MSS and UHF Satcom systems:

Indigenously developed, UHF Satcom System Receives/ Transmits signal in UHF band using Indian Satellite transponder and provides full-duplex Voice/Data communications between ships and ship-to-base. Communication through LOS provides half-duplex Voice/Data Communications between ships.

Our solution is also suitable for other varied mobile platforms including Submarines, Aircraft and Helicopters.

MSS X'ponders:

This is a S-band transceiver Terminal, supports two-way data communication using Indian satellite for tracking of Mechanized and Motorized fishing vessels.

It is used for tracking and monitoring fishing vessels in deep sea, Emergency broadcast messaging in case of Storms & Cyclones, SOS signalling from boats. This is also used for communications in Marine fishing vessels for monitoring, control, and surveillance

HF Communications:

This is an indigenous solution currently coffered in 1KW and 5 KW for Static and Ship borne Applications. The HF Radio operates in wideband (24 KHz) and consists of the latest state-of-art technology.

The HF transceivers system covers the 1.6 to 30 MHz frequency range in 1 Hz steps. Communication is possible in both simplex and half-duplex in Single Sideband (SSB), Amplitude Modulation (AM), and Digital modulation. These HF Transceivers provides the interface for high-speed data and digital voice encryption using external crypto device.

Software Defined Radio:

This is a fully indigenous HF Software Defined Radio (SDR) compliance to Software Communication Architecture (SCA) 4.1.

The HF SDR implements specified transceiver API at the top level, and the hardware is controlled/ accessed through intervening SCA core framework. The ORB (Object Request Broker) layers are running on top of a POSIX compliant real time operating system (Petalinux).

Avantel has the capability to offer multi frequency SDR solutions for tactical and airborne applications as per customer specific requirements.

Wind Profiler Radars:

Our Wind profilers provide three-dimensional high resolution atmospheric wind data on a continuous basis with good spatial resolution. This data is very useful for studying the development of wind shears in near real time.

This is a sophisticated wind profiler, designed to measure atmospheric parameters by analysing cloud reflections. It utilizes a massive multiple element antenna array, with solid-state transmit-receive module. This also provides precise beam steering. The integrated network ensures high-power transmission and sensitive digital processing for accurate meteorological data.

Azad Engineering Limited

Marine Business - Equipment / Services

- **Energy:** Shafts, Bearings, Airinlet, Outer Casing, Inner Casing, Rotating Disc, Spacer, Inlet Guide Vane, Rotor Blades, Stator Vanes, Outer Casing, Rotating Disc, Spacer, Rotor Baskets, Stator Nozzles, Shrouds, Exhaust parts
- **Aerospace & Defence**: Aero foils, Actuator System, APU/Engine Hydraulics, Air Generation System, Fuel Systems, Power Supply Unit, Air Circulation System, Air Purification System, Heat Exchanger Unit, Engine Propulsion System, Safety System, Air Cycle System, Fuel System, Brake Systems, Cockpit
- **Oil and Gas:** Drill bits & Reamers, Rings, Well head Systems, Slips, Shafts, Mechanical Fittings, Valves, Pistons, Cylinder Heads, Connectors, Fabrication

Azad Engineering Limited:

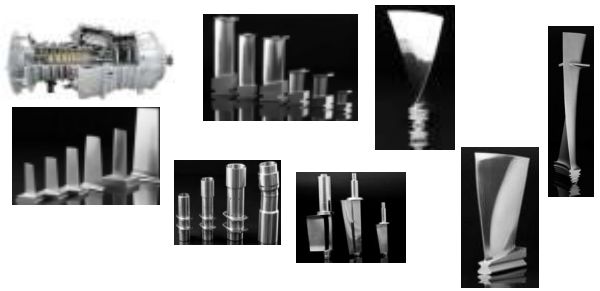
The company was started by Mr. Rakesh Chopdar in 2008 at Hyderabad, manufacturing precision machine parts & components for power generation equipment manufacturers.We are a world-class producer of Highly Engineered Critical Turbine and Aerospace Parts required by Power Generation and Aerospace OEMs. We have built phenomenal expertise in Turbine blades having a monopoly in India. OEMs with varied complex design and Stringent Engineering requirements across the world have been associated with us to manufacture parts for a wide range of their **applications..**

Manufacturing facility meeting Global Standards in Hyderabad with an approx. area of 25,000 Sq. Mtsand~1700 Employees on rolls.

AZAD has witnessed a strong consistent growths in conception (CAGR~42% in last 3 years) .We have a clear focus on adding capacity every year to address the needs of our clients based on their demand cycle. Along with a strong focus on capacity expansion, we are improving our asset utilization to bring in more operational efficiencies (YOY).AZAD's expansion plan include entering into newer verticals and to enable that we are looking to set up a new facility in Medchalover~200,000Sq.Mtroverthe next few years

Gas &SteamTurbineParts-Energy

AZAD manufactures all types of HP, LP and IP Blades for both Radial & Axial flow type with a maximum length of 1600mm and Diameter of 800mm



Aviation&DefenseParts-Aerospace

AZAD manufactures all types of Impeller, Blisk, NGV, Skirt from a round bar of material types like Titanium, Inconel, waspalloy

Energy

Energy is one of Azad's largest and most •established business verticals, dating back to 2006.Whatbeganasa200sqmmachine shop focused on compressor air foils has now expanded into a 25,000 sqm advanced manufacturing facility, delivering combustion components, critical machine parts, and specialized precision-engineered solutions.

•This industry is driven by global leaders like GE Vernova, Mitsubishi Heavy Industries, and Siemens Energy, and Azad has been a trusted Tier-1 partner to each of them for over a decade.

•Our expertise extends beyond Gas and Steam—Azad is also a key player in nuclear energy, holding the exclusive supplier status for nuclear air foils in India, granted by Électricité de France (EDF) in 2021.

•As the world transitions to hydrogen and nuclear power, Azad stands at the forefront of this transformation—delivering innovation, precision, and sustainability for the future of energy.

Aerospace & Defence

•Azad's Aerospace & Defence division has built strong partnerships with global industry leaders, including Boeing, GE Aviation, Honeywell, Eaton, TATA Advanced Systems, Godrej Aerospace, L&T Defence, Rafael, HAL, Mahindra Aero structures, and several others.

•We manufacture mission and life-critical, highly engineered components that play a vital role in propulsion, actuation, hydraulics, and flight control systems for commercial and military aircraft, aero- engines, and space applications. Our advanced manufacturing capabilities include AS9100-certified facilities, 3D machining, and rigorous quality assurance.

•Our team also works closely with GTRE (under DRDO – Defence Research and Development Organization) and the Ministry of Defence, Government of India, for the end-to-end manufacturing, assembly, and integration of complex assembled Advanced Turbo Gas Generator Engine
components. This supports the "Make in India" initiative and strengthens India's self-reliance in defense manufacturing

Oil & Gas

•Azad's Oil & Gas division was established to leverage our expertise in complex part manufacturing and become a key player in the industry.

•We specialize in high-precision components for upstream, midstream, and downstream operations, ensuring reliability in critical environments.

•As a trusted partner to global leaders, we are continuously expanding our footprint in to new geographies, driven by a strong commitment to quality, innovation, and sustainability

Website : www.bel-india.in

Marine Business - Equipment / Services

- Defence Land Multi-function, Surveillance, Fire Control & Weapon Locating Radars, Electronic Warfare Systems, Defence Communication, Electro Optics, Tank & Armoured Fighting Vehicle Electronic Systems, Weapon Systems, C4I Systems, Shelters & Masts, and Arms & Ammunition.
- Naval : Radar Systems, Sonar Systems, Fire Control Systems, Naval Communication Systems & C4I Systems.
- Aerospace : Missile Systems, Air Defence Systems, RF Seekers, Radars, Communication, C4I Systems, Avionics, Unmanned Systems, EW systems.
- Civilian : EVM & VVPAT, Homeland Security, & Smart Cities,Rail & Metro, Energy Storage Products, Network and Cyber Security, Medical Electronics & Healthcare Solutions, Solar - Renewable Energy Business, Space Electronics, Civil Aviation, Unmanned Systems.

Bharat Electronics Limited (BEL) was established in 1954 under the Ministry of Defence, GoI, to meet the specialised electronic needs of the Indian Defence. Today, BEL has grown into a multi-product, multi-technology, multi-unit conglomerate empowering the nation's armed forces to guard the country's frontiers with state-of-the-art products and systems in the areas of Radars, Missile Systems, Military Communications, Naval Systems, Electronic Warfare & Avionics, C4I Systems, Electro Optics, Tank Electronics & Gun/Weapon System Upgrades and Electronic Fuzes.

BEL's non-Defence business segment includes Electronic Voting Machines which revolutionised the voting system in India, Homeland Security & Smart Cities, Satellite Integration & Space Electronics, Railways, Artificial Intelligence, Cyber Security, Software as a Service, Energy Storage Products, Composite Shelters & Masts. When the country wanted its services most, BEL manufactured 30,000 ICU Ventilators in record time to help the Government combat the pandemic.

BEL has been doing its bit to promote the Government's Make in India initiative by laying strong thrust on in-house R&D and indigenisation, outsourcing from Indian private industries, Public-Private Partnerships, Joint Ventures, capacity expansion and modernisation.

BEL is making all-out efforts to tap new export markets across the globe. In a bid to develop new markets in the Indian Ocean Region and friendly foreign countries (FFCs), BEL has operationalised overseas marketing offices in Vietnam and other ASEAN countries. The company has identified Exports & Offsets as one of its thrust areas.

BEL continues to be a profit-making PSU. FY 2024-25 saw the company registering a record turnover of Rs.23,024 Cr (audited), a growth of 16.17% over the previous year. BEL recorded an Export turnover of USD 106.17 Million, registering a growth of 14%.

"Quality, Technology & Innovation" has been the time-tested guiding mantra and motto of BEL. With a vast manufacturing infrastructure, highly skilled manpower and astute leadership, BEL will continue to grow in its chosen areas of operations, and be a pillar of support for the country.

Certifications: ISO 9001, AS9100 D, ISO 14001, ISMS 27001, AS 45001, ISO 50001 EFQM Business Excellence, MoD Green Channel and CMMi Level 5.

Upgraded Schilka

The Upgraded Schilka system is an advanced air defence system against attacking aircraft and helicopters. The upgradation includes replacing the existing Radar, analog computer, engine, GTE with state-of-the-art system and addition of air conditioning system for crew comfort. This upgraded system provides drastic improvements in operational performance, accuracies, power consumption and MTBF. The addition of an electro-optical system operating in parallel with the radar enables accurate identification, acquisition and tracking of targets while operating in an ECM environment. The system is capable of firing aerial targets while on move. The system can accept cueing from external Surveillance Radar. The system can engage enemy aircraft during day or night and in all weather conditions.

Integrated Air Command and Control System (IACCS)

An Automated Air Defence Command and Control Centre for controlling and monitoring of Air Operations by IAF. The IACCS system receives data from different types of homogeneous/ heterogeneous radars (2-D or 3-D) to create real time comprehensive Recognised Air Situation Picture (RASP) at IACCS Command & Control Centre. Salient features are Multi sensor data fusion, Flight plan, Target identification, Surveillance, etc.

Anti-drone D4 System

A very powerful neutralisation system, designed to detect, deter and destroy hostile drones, providing robust defence against aerial threats. Its main features include Real-time search, detection, tracking & neutralisation of drones using its soft kill (RF jamming) and hard kill (Laser DEW) capabilities.

Akash Air Defence System

The Akash Air Defence Missile System is a medium-range, surface-to-air missile system which provides area air defence against multifarious air threats to mobile, semi mobile and static vulnerable forces and areas. The system has cutting-edge features with cross country mobility. The real time multi sensor data processing and threat evaluation enables simultaneous engagement of multiple targets from any direction. The entire system is flexible, up scalable and can be operated in group and autonomous modes. It employs command guidance and relies on phased array guidance radar to guide the missile till intercept.

LR SAM System with MF-STAR

Jointly developed by IAI, Israel, and DRDO to defend against any type of airborne threat, LR SAM system is capable of simultaneously tracking multiple seaborne targets. The MF-STAR is a multi-function S-band solid-state active conformal phased array radar system for the new generation of military ships. As the ship's primary sensor the radar provides 3D long-range air surveillance. At medium range it will automatically track and classify threat and simultaneously, search the horizon for potential missile threats. In parallel, it supports multiple engagements by offensive and defensive weapons. Designated EL/M-2248 the radar system delivers high quality arena situation picture and weapons support, under the toughest target/environment conditions in the existing and future naval arena.

Air Defence Control & Reporting System (ADC&RS) –Akashteer

Air Defence Control & Reporting System – Akashteer automates the Surveillance, Identification, Designation and Engagement functions of the Army Air Defence. It serves as a Command & Control System for Air Defence operations, integrating data from various radar systems and communication networks into a unified, real-time air picture. This helps in identifying the aerial objects as hostile / friendly and designate targets to appropriate weapons for neutralising the threats. Akashteer ensures a seamless and unified air situation picture that is accessible to the lowest operational units of Army AD, enhancing coordination and situational awareness across the force.

Bharat Heavy Electricals Limited

Marine Business - Equipment / Services

- **Weapon Systems : 76/62 SRGM (Super Rapid Gun Mount) – Conventional & Upgraded**
- **Control Systems :**
  Integrated Platform Management System (IPMS), Auxiliary Control System (ACS), Ballast and Cargo Control System (BCCS), Hull Response Monitoring System (HRMS), CCTV System
- **Power Generation Equipment**
  Marine Steam Turbines, Alternators, special castings & forgings, Condensers, Oil coolers, Boiler components
- **Permanent Magnet Machines – Motor-Generator set, Converter / Inverter, Electrical / Mechanical equipment, Pressure Vessels, Steam Generators, Heat Exchangers for Strategic vessels**
- **Propulsion Systems**
  Propeller, Marine GT spares, Steam Turbine, PM Motor

BHEL has been one of the foremost pillars of Atmanirbhar Bharat committed to 'Make in India' since 1964. BHEL has been a pioneer in heavy engineering and manufacturing to meet the growing requirements in the field of power (Thermal, Gas, Hydro, Nuclear, Solar) Generation & Transmission, Rail transportation, Defence& Aerospace, Oil & Gas and other core industrial sectors, serving both domestic and international markets.

In the Defence vertical, BHEL started with supplying Marine Steam Turbines for ships in early 1970s and since then BHEL has been supporting the Defence Forces to achieve self-sufficiency in defence production. BHEL has a proven track record in adherence to quality, long-term product reliability and lifecycle support including overhaul, service life extension, modernization & upgradations. BHEL has been associated with key naval directorates / organizations viz. Shipyards, DMDE, DME, DWE, DEE, WDB, DSP, DOI, DND, DONA, DGONA, DGQA, IRS, Naval Dockyards, DRDO-NSTL, etc. for various products. BHEL has been a strategic partner for Indian Navy supplying critical equipment for the prestigious Strategic Naval Vessel programme undertaking several maiden indigenous developments to achieve self-sufficiency. Over the years, BHEL has acquired the capability & experience in system design, fabrication of special materials like aluminium alloys, titanium alloys, INCONEL, maraging steel etc., precision manufacturing, integration, qualification testing, type test approvals, certifications.

Certifications : AS9100:2016, AFQMS, ISO9001:2015,ISO14001, ISO27001, ISO 45001, ASME, PESO, CEMILAC

Weapon Systems

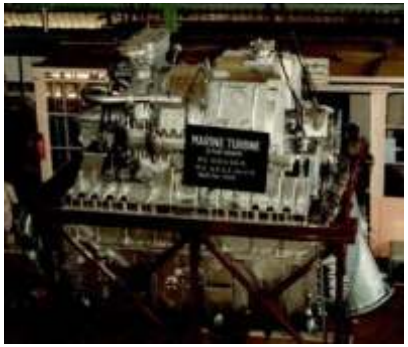
BHEL is the sole supplier of the 76/62 Super Rapid Gun Mount (SRGM) since 1994. SRGM is the main weapon on-board all naval warships, providing unrivalled performance and flexibility in air defense and anti-surface role, particularly in anti-missile role. BHEL has set up a dedicated manufacturing facility for SRGM at its Haridwar plant with state-of-the-art machinery, assembly pits and test equipment. BHEL also provides lifetime product support including services, life extension viz. major overhaul, health audit etc. BHEL has also established Waterfront support facility at Vizag, Mumbai and Karwar to ensure maximum availability of SRGMs.

Control Systems

BHEL supplies IPMS (Integrated Platform Management System) which is designed to automate, control and monitor various critical and non-critical systems of naval ships. IPMS is master controller for Propulsion control and monitoring, Automated Power Management System, Equipment Health Monitoring System, CCTV System, Automatic Fire Detection System, Auxiliaries control monitoring, Battle Damage Control System, Hull Auxiliaries, Aviation Facility Control System. BHEL has successfully supplied and commissioned Auxiliary Control System for P15A and IPMS for IAC Vikrant. BHEL is executing IPMS for NGOPV and FSS (BCCS, HRMS also). BHEL also provides technical assistance in connectorisation, channel checks, Installation, STW, HAT & SAT for Control System.

Power Generation Equipment

BHEL has proven capability to manufacture Marine Steam Turbines, Alternators (as prime mover to diesel engine / steam turbine), Boiler components. In the past, BHEL has also undertaken re-engineering of various heat exchangers including oil coolers and lube oil coolers as well as refurbishment of condenser for INS Viraat. BHEL is also a supplier of key castings and forgings for marine application like A Brackets, P Brackets, Stern Boss, marine shafts, rudder horn, etc. for ships. BHEL has recently successfully demonstrated High Temperature Superconducting technology in association with DRDO-NSTL. BHEL is also in the process of developing switchgear solution for on-board power applications.



Permanent Magnet Machines

Several maiden indigenous developments have been carried out and supplied for strategic naval platforms. BHEL has developed strong expertise in high-energy Permanent Magnets (PM) like Samarium-Cobalt (SmCo) and Neodymium-Iron-Boron (NdFeB). First-of-its-kind developments include PM based Rotary Frequency Converter (PM motor – generator set), IGBT based Converter/Inverter, High speed (10000rpm) PM synchronous motor, Static Bidirectional converter, Axial flux-based PM Synchronous motor. All developments comply to MIL grade standards as per NES, MIL461E & JSS55555 and have been subjected to elaborate endurance trials.

Propulsion Systems

BHEL has successfully developed overhaul spares for Marine Gas Turbine for propulsion of naval ships and supplying for in-service Indian Naval fleet.

BHEL has indigenously developed Permanent Magnet based Propulsion Motor as well as Steam Turbine for propulsion of strategic naval vessels.

BHEL is also setting up dedicated manufacturing facility for Propellers to expand product portfolio and offer end-to-end solution for integrated propulsion system.

Marine Business - Equipment / Services

HIGH PRESSURE COMPRESSORS
(Water cooled / Air Cooled)
for Ships / Submarines / Mobile / Ground support / Stationary use

Burckhardt Compression operates advanced manufacturing and engineering hubs across the world, including a state-of-the-art facility at Kondhapuri, Pune, India, equipped for high-precision machining, assembly, testing, and performance validation. These facilities follow stringent global standards and support seamless engineering collaboration across the company's international network.

In its Defense vertical, Burckhardt Compression (India) is focusing on areas like Shipborne Compression Systems, Submarine-Grade Compressor Packages, Mobile High-Pressure Modules, Ground Support Compression Units, and Stationary Mission-Critical Compression Solutions.

Certifications: ISO 9001:2015, ISO 14001:2015, ISO 45001:2018
Only GreenCoGOLD rated Compressor company by CII.

Features:

- Water-cooled compressors are conforming to shock grade (NSS I & NSS II)
- Discharge pressure up to 400 bar
- Available for air and gas applications
- Compact design with ease of access
- Mounted on anti-vibration mounts
- No civil foundation needed
- Low cost of ownership
- Round-the-clock responsive Customer Support Service

Air Cooled Compressors

Burckhardt Compression (India) Pvt. Ltd. offers the most advanced compression technology for Indian Defense applications through a wide range of High Pressure Compressors. Integrating the latest technology and adhering to international standards, we offer:
Air-cooled compressors suitable for stationary and mobile applications

Water Cooled Compressors

Water Cooled Compressors
Burckhardt Compression (India) Pvt. Ltd. offers compressors type CW / HW / SW / TW for applications where equipment is subjected to severe shocks. Water-cooled compressors specially designed for onboard applications.

- Some of the other features include:
- Water-cooled compressors are conforming to shock grade (NSS I & NSS II)
- Pressures up to 400 bar
- Water cooled
- Compact size
- Already proven at various installation

Marine Business - Equipment / Services

- Electro Hydraulic Steering Gear Control unit
- High Pressure Hydraulicand Pneumatic Valves
- Solenoid Valve, HighPressure Control Valve
- Control System Components
- Propellant Housing with Filter Element
- Air Vent Valves
- Electro Pneumatic Butterfly Valves
- Liquid Relief Valves and Safety Valves (280 Bar application)
- Auto-Controlled High Flow High Pressure Remotely Operated Solenoid Valve

Managed by a qualified technocrats Mr.VK Panday and Mr. Chaitanya Panday equipped with skilled manpower of 60 personnel.

Have the state-of-the-art machinery & facility to manufacture High Pressure Hydraulic and Pneumatic parts to customer specifications.

Successful development of various kinds of products such as cylindrical type and conical type filter elements, filter elements for Propellant Transfer Vehicle for the Prithvi Missile, Propellant Filter Housing with Filter Element, Strainer with Elements, Electro Pneumatic Butterfly Valvefor Defence Research and Development Laboratory (DRDL), Solenoid Valve, High Pressure Control Valve, Antenna Drive System, Elevator Assembly for Telescopic Mast with support for Mast for Research Centrelmar at RCI, 3- way Solenoid Operated Pilot Valve Model for DRDO, Solenoid Operated Hydraulic Direction Control Valves for HOW submarines, High Pressure Reducers, Electro Hydraulic Steering Gear Control Unit for DMDE, Pilot Operated High Pressure Low Flow Solenoid Valvefor Programme AD (PGAD), Lift Check Valves and Spares for Diving and Surfacing System Ship Building Centre, Visakhapatnam, Solenoid Operated Direction Control valve for Godrej & Boyce Mfg. Co. Ltd., Auto Controlled High Flow High Pressure Remotely Operated Solenoid Valve for Kirloskar Brothers Limited for use in Water Mist Fire Fighting System used onboard SPVs.

Certifications: ISO 9001:2015

UNDER WATER PLATFORM APPLICATION

The Electro Hydraulic Control Unit, SMCS-22 (Ship Motion Control System) is intended to control the steering gear while the ship is in operation. The power for operating the system comes from the Ships Hydraulic System (SHS) which is stored in Accumulator banks. This device is actually a two stage, Electro Hydraulic Control Unit consisting of mechanical negative feedback assembly. Basically, there is a main proportional valve which controls the supply of Hydraulic oil under pressure to the cylinders which operate the vertical rudder as well as the fin planes.

ELECTRO HYDRAULIC CONTROL UNIT, SMCS – 22 (TYPE I & TYPE II)

TANK SIDE BLOW DOWN VALVE

The Tank side Blow down valve is used to blow the main ballast tanks and allow the submarine to come up to surface level.

HP AIR REDUCER

We have developed different types of Pneumatic reducers including 2 Stage and 3 Stage reducers for ship as well as submarine applications through Indigenous unit (IU-E) and successfully supplied bulk lots to MO(V) & MO(MB).

HYDRAULIC MANIPULATOR

The Electrohydraulic manipulator is used in the ships hydraulic control system for opening and closing of Hydraulic operated machines Remotely and hydraulically.

GREASE DISTRIBUTOR

The Grease Distributor distributes the grease received from the lubrication device through the pipelines and lubricating parts of the ships outboard system.

Marine Business - Equipment / Services

- Weapon and Control Systems
- Diving and Surface Systems
- Propulsion systems
- HP Air Systems
- Hydraulic Systems
- Breathing Systems
- Exhaust Systems
- Ventilation Systems
- Fire Fighting Systems

M/s CFF Fluid Control Ltd. stands as a leading force in India's defence manufacturing sector, embodying the nation's pursuit of self-reliance and indigenous capability under the Atma Nirbhar Bharat mission. Since its inception in 2012, the company has evolved from a modest component manufacturer into a comprehensive provider of advanced systems for naval ship and submarine platforms.

This transformation has been driven by continuous innovation and development in manufacturing and technology led by a highly motivated skilled and qualified engineering team, with strong collaboration with global defence leaders. Partnerships with organisations such as Naval Group France and Atlas Elektronik Germany have played a vital role in enhancing CFF's technological depth, manufacturing standards, and alignment to Atma Nirbhar Bharat.

CFF's diverse product portfolio today supports a broad spectrum of critical naval ship and submarine applications, including sonar systems, stealth systems, integrated platform management systems, Underwater Communication System (Towed Wire Antenna) and weapon systems. Backed by state-of-the-art facilities, a culture of innovation, and rigorous quality control, the company has earned the trust of major domestic shipyards as well as international OEMs.

With a strong operational footprint across India and a dedicated workforce of over 250+ professionals, CFF Fluid Control Ltd. is well positioned to serve the full lifecycle requirements of Indian Navy ships and submarines, while consistently meeting the most stringent global defence standards.

Certifications: ISO 9001 :2015

TORPEDO LOADING AND LAUNCHING SYSTEM

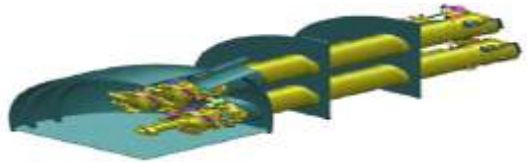
Weapon Embarkation system (KX) – used to carry out external handling operations when embarking or disembarking weapons from the shore to the weapon handling storage (KE System). Operation involves receiving weapons, embarking and disembarking the weapons.

Torpedo Launching system (KT) – this system provides the storage and launching of weapons and to compensate for their weights after firing. System is designed for launching of torpedoes and missiles

CFF signed framework agreement with Naval Group to facilitate technology transfer for repair, Overhaul and Maintenance activities onboard Kalveri Class Submarines

KX System - Weapon Embarkation System

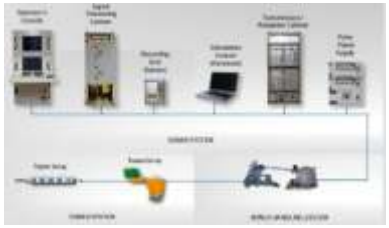
KT System - Weapon Handling System



TOWED ARRAY SONAR SYSTEMS

We are engaged in the indigenous development, integration, testing, and lifecycle support of towed array sonar systems for ASW applications on submarines and surface combatants, leveraging advanced manufacturing capabilities.

With robust infrastructure, qualified manpower, and strategic partnerships with TKMS and ATLAS Elektronik (Germany), CFF delivers mission-critical sonar solutions in compliance with Indian Navy specifications and aligned with Make in India objectives.



INSTALLATION REPAIR AND REFURBISHMENT OF MCA 62.5 ONBOARD IN SUBMARINE

The company provides comprehensive installation, repair, overhaul, and refurbishment of MCA 62.5 systems onboard Indian Navy submarines. Services include fault diagnosis, defect rectification, and replacement of mechanical, electrical, electronic, and electro-pneumatic assemblies to maintain optimal system performance and reliability.

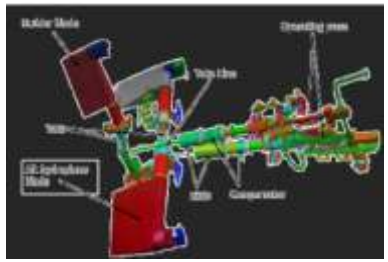
Servicing, testing, and replacement of valves, sensors, motors, gearboxes, inverters, microswitches, and electro-valves to ensure reliable and efficient system operation.

Maintenance and servicing of frequency separation boards, power modules, test and control boards, and air power supply panels, including handling of associated sub-assemblies, safety links, antenna elements, and transparent tubes.

DESIGN & DEVELOPMENT OF INDIGENISED STEERING GEAR & RUDDER

Design, Manufacture, Marketing & Sales of Marine & Industrial Equipment'sup to 300 mm Diameter, manufactured in Brass, NAB (Nickel Aluminium Bronze), Stainless Steel, and Gun Metal, suitable for Marine, Defence, and industrial applications.

The product range includes equipment's like Ball Valves, Safety, Pressure Reducing, Non-Return valves, Junction Blocks, Permuatator & Distributor, HP Air Panels for different Systems, Gate, Globe, Kingston, Angle, Hydraulic Actuated, Needle, Pneumatic Control, Manually Operated Distributors,SOQC and AOQC Valves diameter up to 800 mm



DIESEL ENGINE AIR INTAKE, EXHAUST SYSTEM & GT/DE IRSS

Design, manufacturing, fabrication, assembly, and comprehensive testing of Diesel Engine Air Intake and Exhaust Systems for marine, defence, and industrial applications. These systems are engineered to ensure optimal engine performance, safety, noise reduction, and effective emission control under demanding operating conditions.

The scope of work covers IRSS devices (GT/DE), WIS piping integral to nozzle valves and fittings, seawater pumps, control systems, expansion bellows, insulation arrangements, and mounting supports. All components are manufactured using stainless steel and specified special alloys in accordance with application-specific requirements.

Each system is subjected to comprehensive inspection and testing, encompassing dimensional verification, leakage and pressure testing, vibration and alignment assessment, noise attenuation verification, thermal performance validation, and functional trials. All tests are conducted in accordance with Indian Navy, defence, and relevant international standards to ensure reliability, durability, and extended service life.

DESIGN, MANUFACTURE, MARKETING & SALES OF MARINE & INDUSTRIAL EQUIPMENT'S

Design, Manufacture, Marketing & Sales of Marine & Industrial Equipment'sup to 300 mm Diameter, manufactured in Brass, NAB (Nickel Aluminium Bronze), Stainless Steel, and Gun Metal, suitable for Marine, Defence, and industrial applications.

The product range includes equipment's like Ball Valves, Safety, Pressure Reducing, Non-Return valves, Junction Blocks, Permuatator & Distributor, HP Air Panels for different Systems, Gate, Globe, Kingston, Angle, Hydraulic Actuated, Needle, Pneumatic Control, Manually Operated Distributors,SOQC and AOQC Valves diameter up to 800 mm

CRIMSON ENERGY EXPERTS PVT. LTD

Marine Business - Equipment / Services

- DEEPDARSHAK
- ICESTORM
- RED RAVEN
- AMRUT-HYDROGEL
- CRUXINT

Crimson Energy Experts Private Limited (CEEPL) is an ISO 9001:2015 certified Indian company established in 2012, providing Design, Development and Engineering Support Services to the Indian armed forces, Research organizations (DRDO) and Defence Public Sector Undertakings (Bharat Electronics Limited - BEL, Bharat Dynamics Limited -BDL). Over the last 14 years, Crimson has expanded with Eleven offices across India with over 375+ employees. Our project teams are working inside the premises of various govt organizations and DPSUs due to the sensitive nature of the projects we are undertaking or as part of joint teams.Crimson has three main verticals,namely Defence, Nuclear Energy and AI/ML. Our range of activities and capabilities includes:

(a) Engineering Consultancy including Nuclear Design.

(b) Submarine Design Review/ Vetting

(c) Digitization and Documentation (IETM up to level V)

(d) Deployment of technical resources for compact NPP - MROT.

(e) Refueling support

(f) Project Management, Manufacturing Support and Specialized Services in Nuclear, Defence, Marine & Energy Sectors.

(h) AI based Situational Awareness solutions.

(i) Customised Inventory Management packages.

(j) CBTs / Training simulators for weapon systems & AR/VR based systems.

(k) Customised and comprehensive tree dimensional Intrusion detection systems (3DPDIS) & AI enhanced Counter drone solutions.

(m) Unmanned/ autonomous systems.

(n) Reliability and PLCS studies for DRDO.

Certifications: ISO 19443:2018, ISO 9001:2015, ISO 14000:2015, etc.- Certificantes.

DEEPDARSHAK

The Electro Hydraulic Control Unit, SMCS-22 (Ship Motion Control System) is intended to control the steering gear while the ship is in operation. The power for operating the system comes from the Ships Hydraulic System (SHS) which is stored in Accumulator banks. This device is actually a two stage, Electro Hydraulic Control Unit consisting of mechanical negative feedback assembly. Basically, there is a main proportional valve which controls the supply of Hydraulic oil under pressure to the cylinders which operate the vertical rudder as well as the fin planes.

DEEPDARSHAK
Integrated Maritime Analytics Platform

ICESTORM™

Crimson Energy's ICESTORM™ software delivers state-of-the-art Interactive Electronic Technical Manuals (IETMs) from Level 2 to Level 5 revolutionizing documentation with advanced AI, 3D visualization and MROT integration. With a team comprising ex-Navy officers, scientists, engineers and software experts we leverage decades of defence and technical experience to craft comprehensive user-centric solutions for operation, maintenance and repair across industries.

RED RAVEN

Crimson's MIL-STD 461F-certified Wireless Fire Detection System offers high-sensitive battery-operated sensors designed for marine and industrial safety. The system features an intelligent display unit that provides real-time updates and alerts ensuring quick response to potential fire hazards. With intelligent mesh networking and easy installation it delivers uninterrupted protection in even the most demanding environments.

AMRUTTM -HYDROGEL

Amrut is an advanced eco-friendly Hydrogel designed to address water scarcity and improve soil health across agriculture, horticulture and landscaping. Biodegradable, non-toxic and capable of retaining up to 500 times its weight in water it significantly reduces water usage while enhancing soil properties.Amrut supports healthier plant growth, prevents erosion and reduces water runoff and evaporation losses offering a long-lasting sustainable solution for modern resource management.

CRUXINT: LLM-POWERED OSINT ANALYSIS PLATFORM

CRUXINT is a cutting-edge, LLM-powered Open-Source Intelligence (OSINT) analysis platform specifically designed to meet the customized intelligence inputs required by our Defence Forces from open-source data. The system leverages advanced Large Language Models (LLMs) to ingest, categorize, and analyse multilingual news articles - sourced from newspapers, social media platforms and other public portals - to deliver predictive, contextual, and actionable intelligence. This fully customizable system leverages advanced artificial intelligence, graph-based data modelling, and real-time threat analysis to provide comprehensive situational awareness and predictive intelligence capabilities.

CUMMINS INDIA LIMITED

Marine Business - Equipment / Services

Core Segments Served Government & Defense: Collaborative projects with the Indian Navy and Coast Guard for naval ships.

Marine Product Portfolio

Propulsion Engines: Cummins offers a range of propulsion solutions from 140 HP to 4,200 HP, including the mechanical K and N Series and the electronic Quantum Series, designed for diverse commercial and recreational applications.

Auxiliary & Gensets: CIL provides constant-speed auxiliary engines and integrated marine generator sets ranging from 7.5 kVA to 3,750 kVA.

Recon Engines: Their Recon portfolio offers factory-remanufactured engines, providing a cost-effective alternative to new engines with the same performance standards.

Commercial Marine: Powering trawlers, tugboats, and dredgers, as well as passenger ferries and offshore supply vessels.

Recreational: Supplying engines and Onan marine generators for private yachts and recreational boats.

Cummins India Limited (CIL) is India's leading manufacturer and distributor of diesel and natural gas engines, power generation systems, and related technologies, a subsidiary of the US-based Cummins Inc., serving diverse sectors like automotive, marine, defense, mining, and construction. Operating through key business units (Engine, Power Systems, Components, Distribution), CIL offers comprehensive solutions including high-horsepower engines, gensets (7.5 kVA - 3750 kVA), filtration, emission solutions, and extensive service networks across India.

CIL manages its marine business through its Power Systems and Distribution units, providing high-performance propulsion and power generation solutions.

Manufacturing Hubs: Kothrud Engine Plant (KEP) in Pune and the Phaltan Megasite in Maharashtra.

Distribution Network: 21 authorized dealerships and over 450 service touchpoints across India, ensuring 24/7 technical and aftermarket support.

Localization: CIL emphasizes "Made in India" solutions, meeting stringent domestic requirements and supporting local suppliers for the naval sector.

Certifications: Green Channel Status by MoD, Government of India |
ISO 9001:2015, ISO 45001:2018,
ISO 50001:2018 | Plant approvals by ABS, IRS,BV,LR,KRS, DNV Marine agencies
NABL accreditation to Standard & Material Lab

Propulsion Engines

The Electro Hydraulic Control Unit, SMCS-22 (Ship Motion Control System) is intended to control the steering gear while the ship is in operation. The power for operating the system comes from the Ships Hydraulic System (SHS) which is stored in Accumulator banks. This device is actually a two stage, Electro Hydraulic Control Unit consisting of mechanical negative feedback assembly. Basically, there is a main proportional valve which controls the supply of Hydraulic oil under pressure to the cylinders which operate the vertical rudder as well as the fin planes.

Auxiliary & Gensets

Cummins Marine Auxiliary and Genset portfolio provides a comprehensive range of power solutions, starting with the Onan Series (4–195 kW), which features sound-shielded, compact designs tailored for recreational yachts and superyachts. For light commercial use, the B Series (60-180kW) offers "Smart Starting" and electronic controls for tugs and fishing vessels, while the C Series (144–240 kW) utilizes high-pressure common rail systems to enhance fuel economy for offshore support and ferries.Higher power requirements are met by the X Series (450–500+ kW), which introduces predictive service insights for modern commercial hulls, and the rugged K Series (268–1,600 kW), known for its mechanically simple and durable design in deep-sea applications. At the top of the lineup, the Quantum High-HP series (1,500–3,150 kW), including the QSK60 and QSK95, powers warships and cruise ships using an advanced MCRS fuel system and SCR aftertreatment to meet strict IMO Tier III emissions standards.

Recon Engines and Gensets

Cummins offers factory - remanufactured ReCon engines as a sustainable and cost-effective repower solution, providing like-new performance with significantly less downtime than a local rebuild. These engines undergo a rigorous process where they are completely disassembled, cleaned using advanced technologies like lasers and ultrasound, and meticulously inspected to meet original factory specifications. To ensure peak efficiency and reliability, every ReCon product is updated with the latest design standards and components, and they are typically backed by a Cummins warranty with options for extended coverage. Cummins designs and manufactures every major component of their marine gensets to ensure optimal system harmony and performance across a diverse range of applications. This comprehensive portfolio includes the Onan Series (4–195 kW), which provides quiet and reliable power for recreational yachts and small commercial vessels through compact, sound-shielded designs. For more demanding roles, the K Series (268–1,600 kW) utilizes advanced engine platforms to provide ship service and emergency power for medium-to-heavy commercial duty. At the top of the lineup, massive high-horsepower DGs based on the QSK60 and QSK95 platforms deliver up to 3,150 kW, powering critical operations for warships, cruise ships, and large diesel-electric vessels.

D&H Sécheron Electrodes Pvt. Ltd.

Marine Business - Equipment / Services

- Naval: Plate Welding Ship body building
- Naval construction welding

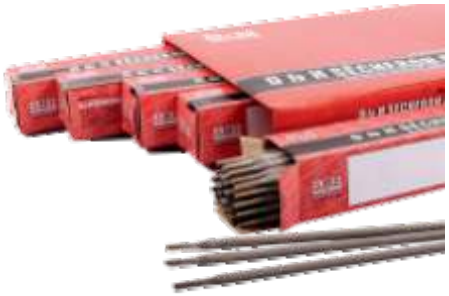
D&H Sécheron Electrodes Pvt. Ltd. was established in the year 1966 and became one of India's leading welding consumable manufacturers. Our organization is accredited with ISO 9001:2015, ISO 14001:2015 & ISO

45001:2018 quality system standards. Our testing lab is accredited by ISO/IEC 17025:2017 in the field of chemical, mechanical and corrosion testing. Supratherme, one of our earliest and proudest achievements, (synonymous with the name of D&H Sécheron) was followed by a host of special electrodes for some of the most critical applications in the industries. Quality and Innovation are the key drivers for our sustainable growth over the past 57 years. We manufacture more than 800 products for SMAW, GMAW, GTAW, FCAW & SAW processes. The welding consumables manufactured by us conform to the applicable specifications laid down by the BIS, AWS, DIN, JIS and EN ISO standards and are approved by reputed inspection agencies like BIS, RDSO, PDIL, LRA, BV, ABS, IRS to list a few.

Certifications:ISO 9001:2015, ISO 14000: 2015, etc.

NITHERME-2.5 (MOD)

NITHERME-2.5 (MOD) is a low hydrogen electrode depositing 2.8%Ni and 0.3%Mo weld metal. Pleasing operating characteristics. Weld metal of radiographic quality suited for welding grain refined steels and nickel steels for service temperatures down to -50°C. Typical applications include storage tanks for liquified gases like Ammonia, distillation coke ovens, batteries, petrochemical industries, DMR 249B (AB2) steel, etc. Also suitable for welding heavy sections and highly restrained joints subjected to dynamic loading, impact and severe service conditions.



COREFIL-Ni (MOD)

Corefil-Ni (Mod) is a low alloy and hydrogen controlled (4ml max) flux cored wire designed for welding of medium tensile steels structures subjected to dynamic loading and impact resistance requirements down to -50°C. The wire gives good performance under CO_2 shielding with radiographic quality weld deposits. The wire produces thin & friable slag covering with shiny bead appearance. Corefil-Ni (Mod) is designed for single and multi-pass welding of ship building grade DMR 249 grade A steels. The wire is also suitable for fabrication of heavy & rigid structure, pressure vessels etc.

DK-18Ni (Mod)

DK-18Ni (Mod) is a basic coated low hydrogen electrode for low temperature application welding. Suitable for welding of DMR grade fine-grained steel, heavy section fabrication, pressure vessels, stockist pipelines, fine grained quenched & tempered steels, etc. where high stress & dynamic loadings are applications are involved. The weld metal is of radiographic quality. Typical material grades weldable with this electrode are—DMR 249A, C/D grades of ASTM SA-414, Grade 55 & 60 steels of SA-516, Steels conforming to SA-814, IS: 2002, IS: 2062 and equivalent grade of steels.

D&H-3U

D&H-3U is a specially designed electrode for welding U3 steel. The weld metal has excellent crack resistance and has good scaling resistance. It produces quiet and stable arc, which is easy to strike and re-strike. Detachability of slag is very easy. The weld metal is of radiographic quality. Ideal for joining ferritic to austenitic steels, armour plates, austenitic manganese steels, dissimilar materials, etc.

DESMI India Private Limited

Marine Business - Equipment / Services

- **Shock Rated Pumps,**
- **Refueling systems,**
- **Ballast Water Management Systems**
- **Helicopter Refueling**
- **Ballast Water Management Systems**

DESMI works closely with MODs, OEMs, and shipbuilders to deliver critical flow processes that help governments on every continent achieve their national security ambitions. Our pumps and supporting systems are trusted worldwide for dependability and performance.

We help you maintain stringent operational standards through sector insight, tight security protocols, and the flexibility to navigate complex processes. We offer global support and after-sales service plus an efficient global supply chain.

Founded in Denmark in 1834, we have provided the expertise, solutions, and aftermarket support our customers need for nearly two centuries. We help you operate more efficiently and reliably, enabling you to complete your missions, achieve your tactical goals and strategic objectives – and get your vessels and crews safely back.

Shock Rated Pumps, Refueling systems, Ballast Water Management Systems

Bilge, fire, ballast, general service, cooling, fuel and lube oil transfer pumps
Any of these pump applications can be supplied fully shock rated and for fully submerged operation in compartments that are vulnerable to 'action' damag

Helicopter Refueling

DESMI refueling systems are engineered for military and naval use, delivering clean, dry fuel for fixed-wing aircraft and helicopters. Ship-based systems support pressure and gravity refueling, defueling, and HIFR, and include pump and filtration modules, dispenser units, and integrated control systems. Twin pumps with filter water separators ensure high reliability, and all systems can be customized to customer requirements.

PumpandFiltrationModule
Dispenser Module

Ballast Water Management Systems

DESMI Ballast Water Management Systems can be configured for shock tested according to naval standards. Is the most compact BWMS on the market which combines very low space with large flow rates. The operation of the system is based purely on mechanical treatment, and therefore, it does not involve any use of chemicals or active substances.Thiseliminatesrisksofhazardstocrew,vessel, and the environment.

Elecon Engineering Company Limited

Marine Business - Equipment / Services

Marine Gearboxes for Indian Navy and Indian Coast Guard

ELECON is a leading Gearbox manufacturer for both industrial as well as defence platforms. It has a unique distinction of supplying state-of-the-art and complex bespoke Gearboxes for frontline ships of Indian Navy and Indian Coast Guard. The corporate office and manufacturing facility is located at Vallabh Vidyanagar, Gujarat along with sales / service support offices Pan India.

Certifications: ISO 9001:2015, ISO 14000 : 2015, ISO 45001:2018

Gearboxes for New Generation OPVs of Indian Navy

Single stage Reduction Gearbox driving a Controllable Pitch Propeller (CPP) and continuously transmit propulsive power from a Diesel Engine for all modes of operation.

Gearboxes for front-line stealth frigates of Indian Navy (Old Generation & New Generation)

CODOG (Combined Diesel or Gas turbine) type gearbox designed to transmit the power from Gas Turbine (GT) or from Diesel Engines (DE) to the respective shaft (CPP).

Gearbox for Aircraft Carrier of Indian Navy

COGAG (Combined Gas Turbine and Gas Turbine) type gearbox designed to transmit the power from one Gas Turbine (GT) or both Gas Turbines to the respective shaft (CPP).

Gearbox for Advanced OPVs of Indian Coast Guard

Single stage Reduction Gearbox driving a Controllable Pitch Propeller (CPP) and continuously transmit propulsive power from a Diesel Engine for all modes of operation

Gearbox for OPVs of Indian Coast Guard

Planetary Gearbox with co-axial input and output shafts driving a Controllable Pitch Propeller (CPP) and continuously transmit propulsive power from a Diesel Engine for all modes of operation

ELECTRO PNEUMATICS AND HYDRAULICS (INDIA) PVT LTD

Marine Business - Equipment / Services

Ship Damage Control Simulator, Fire Fighting Training Facility, Submarine Handling & Motion Control System, Submarine Damage Control & Fire Fighting Simulator, Nuclear Biological, Chemical Training Facility, Ship Engine room Simulator, Soft Panel Simulator, Remote control Weapon System, Automated L-60/L-70 Gun, Ship based Air Defence Missile Launcher, Submarine Resue & Escape Training, Deep SubmergenceRescue Vessel (DSRVS), Life Cycle Support / Consulting

Design, Develop and manufacture Naval Weapon Systems, Simulators & Training facilities in India and abroad, meeting world class standards. Life cycle support for 25 years with regular upgrades, training & consultancy for naval infrastructure development. Develop project execution roadmap, set concrete milestones, generate BOM's estimate costs and specify key deliverables. Assist clients in procurement of resources, quality control, 3rd party inspection and approvals. Provide custom-made and tailored solutions for all marine and naval requirements, in a time bound manner, Offer a full spectrum of design and engineering services using the latest technologies to give mission and combat success.

Certifications:ISO 9001:2015, IATF 16949

Ship Damage Control Simulator.

The DC's impart training to the ship's crew for battleship damage control scenarios in a real war-like situation. It simulates war-time damages including flooding with explosion sounds, smoke and damage to systems occurring in acontrollable rolling environment. The unit is designed for exercising 25-30 trainees at a time

Ship Fire Fighting Training Facility

The FFTF imparts realistic fire-fighting training to personnel serving onboard ships. The trainees experience fire, high temperature, low visibility, smoke, sound etc, which prepares them for prompt and effective response. During the training, trainees fight fires in the most fire-prone compartments of the ship using fixed / portable firefighting equipment

Submarine Handling & Motion Control System

The SHMCS is a fully functional replica of the equipment, consoles and instrumentation of the 1st deck of control room of a submarine. It includes an onboard panel, watchkeeping panels, communication devices with dynamic and static mockups. Imparts submarine crew training in operation of various systems and equipment in control room

Submarine Damage Control & Fire Fighting Simulator

SM DC FFTF imparts realistic and integrated training to the submarine crew for managing and controlling damage and for firefighting emergencies. It allows training of control room and compartment watchkeepers to respond in emergency situations and initiate laid down actions to mitigate the emergencies.

Nuclear Biological Chemical Training Facility

NBCTF is used for real-time defence training from nuclear, biological, chemical, radiological and other nuclear agents onboard ships by simulating scenarioslike: 1. Automatic detection of agents by ship-borne fixed equipment and sensors.
2. Alarm-emergency stations and change over to citadel condition.
ETC

Ship Engine Room Simulator

SERS imparts ship's crew learning and training experience in a 'real' engine room scenario that includes a working main diesel engine, attached to a propeller, through shafting. The facility is also used for hands on training on other auxiliary machinery like DG's, ref plant, AC and other equipment for operation, maintenance and watchkeeping.

Soft Panel Simulator

Soft Panel Simulators are developed by EPHL to put ship's crew trainees in a computer-generated immersive environment where they learn to operate equipment, systems, tools and tackles with/without other members of the crew through coordination and communication. This simulated environment is highly realistic with high fidelity and provides the perfect training platform for learning a wide range of specialist skills and meeting key training objectives such as starting / stopping / operating propulsion plants like gas turbines, diesel engines, etc

Remote Control Weapon system

RCWS is often equipped with a fire-controlled system, which can be installed on moving platforms like combat vehicle or sea-going vessel or stationary locations like watch tower for perimeter defence. Our RCWS design is modular,
lightweight and compact. It allows use of the client's existing weapons and alterations.
The design maximizes operator safety, accurate fire, improved situational awareness and crew survivability.

Automated L-60 / L-70 Gun

Guns such as L-60, L-70, Zu-23 can be upgraded from manual systems into sophisticated fully automated electro-mechanical systems in a cost effective manner. The upgrade includes MIL grade controllers with HMI. Enhanced Tactical Computers (ETC's) servo motors and drives, EO system with auto-tracker, ammunition handling system, MVR, INU, etc and seamless integration with external radars and C2 system

Ship-Based Air DefenceMissile Launcher

A joint turnkey design and development project with DRDO involving design and manufacture of the missile launcher, its installation and trials onboard an Indian Naval Ship. This advanced weapon system launches interceptor missiles that track and destroy incoming enemy missiles in higher atmosphere

Submarine Rescue & Escape Training

Submarine Escape Training is a systematic and gradual process of exercises and drills in which the trainee is acclimatized to the escape suit and the operational surroundings during an actual escape. It prepares submarine crew to escape from a disabled or sunken submarine. This includes creating conditions of sunken submarine in the training area, in terms of space, systems, pressure and level of difficulty.

Deep Submergence Resue Vessel

DSRV's is a fully functional replica of the Submarine Resue Vessel (SRV) having a motion platform with two degrees of freedom (2 DOF), i:e rolling and pitching motion and a front facia replica of the Remotely Operated Vehicle(ROV) that is stationary DSRV simulator has the same look, feel, functionalities, man-machine, interface & response time of the ROV and SRV.

Life Cycle Support / Consulting

EPHL has an experienced team comprising of marine engineers, naval architects, production engineers, electrical engineers, structural architects for civil works. EPHL has been providing Life Cycle Support to all its naval simulators and has consistently maintained an operational availability of >95%. Apart from this we provide product support updates and obsolescence management. We also provide training and upkeep services for the simulators and can deploy training teams.

Electronics Corporation India Limited

Marine Business - Equipment / Services

Radio Communication System, Seekers,Servo Control System, Sensors Package System, Ship Borne terminals, VSATCommunications & Networking solutions, Radiation Monitoring System, CBRN Threat Monitoring System, C4I Systems, SNAS, Encryption devices for secured communications, SCADA & PLC Systems, Fuzes,Anti Drone Jammers, XBT Expendable Bath Thermographetc.

Electronics Corporation of India Limited (ECIL) is a Miniratna Central Public Sector Enterprise under the Department of Atomic Energy (DAE), established in 1967 with the mandate to meet the Control and Instrumentation requirements of India's Nuclear Power Programme. Over the decades, ECIL has played a pioneering role in strengthening the indigenous electronics ecosystem, delivering solutions ranging from miniature components to complex, mission-critical systems.

A multi-product, multi-disciplinary, and multi-technology organization, ECIL provides cutting-edge technology solutions of national importance across Defence, Aerospace, Homeland Security Solutions, IT & e-Governance

Certifications : ISO 9001:2015, ISO 14000 : 2015, EMS ISO45000:2018 Level 5 CMMI certifications etc

ECIL has pioneered landmark products such as Control & Instrumentation systems for Nuclear Power Plants, Automatic Message Switching Systems, Programmable Logic Controllers, and Electronic Voting Machines.

ECIL is supported by advanced infrastructure for manufacturing, Testing and stringent quality systems catering to strategic applications. Its facilities include CAD and ASIC/VLSI design, hybrid microcircuits, PCB manufacturing, automated SMD assembly, online PCB testing, radiation instrument calibration, environmental and EMI/EMC testing, Compact Antenna Test Range, High Density Interconnect facility, and IT-enabled processes, enabling end-to-end solutions from design to deployment.

M7 RADIO & V/UHF Equipment

Software driven multi-mode Radio provides both voice & data transmission and reception.
Frequency Range 100 MHz to 399.975 MHz with Transmitter power output 50W in AM and 100W in FM.
Designed for fixed, Civil Air Traffic, maritime and military applications.
Meets international maritime requirements in the range 156 MHz to 163 MHz for both Ship and shore station configur

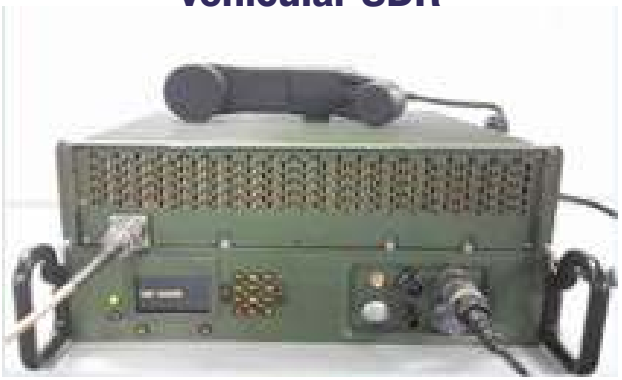
Manpack SDR

Mission-ready V/UHF Manpack Software Defined Radio.
Operating in the 30-512 MHz band.
It supports Ground-to-Ground and Ground-to-Air Line-of-Sight (LOS) communication for both voice and data, in clear and secure modes.
Buit on SCA 4.1 software architecture, ensuring long-term scalability and interoperability.

XBT Expendable Bath Thermograph

ECIL's PC Based XBT Recording System- RS10A uses industry standard computer technology to measure and display ocean temperature data as a function of depth.
Measurement can be done up to 460 m.
The system software acquires displays and stores the data transmitted from the Expandable Bathy Thermograph probe in real time.

Vehicular SDR



SIRS

TR2400 HF Radio

- 100W HF Radio is designed for long range secure communication needs of the Indian Defence Forces.

Operates from 1.6 to 29.99999 MHz

ALE, Encryption and FH modes available for both voice and DATA.

Can be configured as Man pack, Mobile and Base station applications.

Radio Frequency (RF) SEEKER

- Indigenously developed X-band RF Seeker in collaboration with DRDO and BARC.

The RF Seeker is an airborne radar system that guides a missile towards a fixed or manoeuvring target during the terminal guidance phase of its flight.

Four BrahMos missile flight trials have been successfully completed using the ECIL-developed RF Seeker.

Pilot production is currently in progress, paving the way for full-scale productionisation.

CBRN (Chemical, Biological, Radiological, and Nuclear) Threat Protection System

- Implemented at Parliament & followed by implementation in other strategic areas.

ECIL deployed Indigenously manufactured radiation and nuclear detectors; chemical/biological capability expansion through strategic collaborations.

MoU with Proengin, France and ToT from DRDO for CBRN integration

Fixed CWA Detector -IMS

Fixed BWA Detector - FPD

Area Gamma Monitor (AGM)

Elgi Sauer Compressors Ltd

Marine Business - Equipment / Services

Surface Ships:

Medium G High – Pressure Air compressors for all compressed air requirements such as starting air, working air, weaponry, G emergency applications on naval vessels.

Pressure Reducing Stations.

Upstream G downstream compressed air accessories such as dryers, BA (breathing air) filters, high pressure bottle racks G BA filling boxes.

Submarines:

High –Pressure Air compressors for all com- pressed air requirements such as ballast- ing, starting air, working air G weaponry on naval submarines.

Elgi Sauer Compressor Ltd. (ESCL) Established in the year 2008, ELGI Sauer Compressors Ltd is the joint venture between Elgi Equipments Ltd, Coimbatore, India and Sauer Compressors, Germany. The joint ven- ture brings together Elgi's decades of experience in the Indian industrial and defence market and Sauer's ex- perience as a Global leader in the manufacture of High pressure air compressors for Navy, Ship- ping & Industry. ELGI Sauer focuses on consolidating the engineering, indigenization and product support capabilities of both the constituent entities, to build state-of-the-art products and provide customized so- lutions for the Defence, Shipping, Industrial and Off- shore markets in India.

ESCL manufactures high-pressure air & gas compres- sor packages for the Naval, Industrial, Commercial Shipping and Offshore markets. It also houses an Engi- neering Support Centre for global new product devel- opment and prototype testing standing testament to our commitment to innovation and excellence.

Certifications:ISO 9001:2015
ISO/IEC 17021-1:2015,
Type Approvals from DNV & ABS

Elgi Sauer compressors for the Indian Navy

High-pressure compressed air solutions up to 400 Bar for the most extreme naval requirements. Our water- cooled & air-cooled , high-pressure compressors are proven worldwide in exceptionally tough applications. They are operational in major global navies and sup- plied to major projects of the Indian navy such as INS Vikrant, INS Visakhapatnam class, INS Nilgiri class, ASW corvettes to name a few. The compressors meet all naval requirements such as shock resistance, low- est noise & vibration and sea state conditions provid- ing reliable operation over the life of the vessel.

5000 series WP5000 G WP5500 water-cooled HPAC:

4 stages / 4 cylinder
350 bar max pressure
56-175 m3/hr flow rate
Compressor specially developed to meet stringent naval requirements such as low SBN & ABN, shock strength and vibration resistance Unique vertical crankshaft with radially arranged cylin- ders and pistons with lowest unbal- anced forces. Direct sea water cooling suitable for most aggressive sea water conditions & high efficient separators for best air quality
These compressors were developed and have evolved over the past 3 decades in line with global navy requirements

Hurricane series WP4331 air-cooled HPAC:

4 stages / 4 cylinder
400 bar max pressure
35 m3/hr flow rate
The 4-stage air-cooled high pressure compressors are the top choice for de- manding applications up to 400 bar. With directly-driven and highly-efficient air cooling system, they provide maxi- mum reliability, efficiency and ease of maintenance even in the most difficult conditions. Both motor driven & diesel engine driven option for emergency application
The reliability of our black-start or emergency air compressors has been proven well in this demanding naval

MISTRAL series WP45L G WP15L air-cooled MPAC:

2 stages / 2 cylinder
40 bar max pressure
16-96 m3/hr flow rate
The 2-stage air-cooled compressors have been a key contributing factor to the repu- tation of Elgi Sauer Compressors as relia- ble workhorses.
Outstanding characteristics of this com- pressors are simple yet rugged design, high efficiency cooling fan, reliable opera- tion, even under extreme conditions (55 ° C ambient temperature), Heavy duty, rigid flange connection between motor and compressor

Refrigeration Plants

4 stages / 4 cylinder
250 bar max pressure
100 m3/hr flow rate
The unique swash-plate design of the TGM range of compressors stands for highest precision and craftsmanship. They have an extremely low level of structure-borne noise and a unique compact design, which allows the com- pressor to be carried through a pathway of only 68cm diameter , hence most suitable for submarine applications

27

Energypack Boilers

Address :Mumbai Office: 12, New Sadguru Nanik Ind. Premises, Western Express Highway, Goregaon (E), Mumbai – 400063
Phone : +91 91362 47055 | +91 95372 47055
Email: sales@energypackboilers.com | Website: www.energypackboilers.com

Marine Business - Equipment / Services

- Auxiliary Boilers
- Power Boilers
- High Pressure Autoclaves
- Composite Autoclaves
- Core Leaching Autoclaves

Energy pack manufacture boilers, autoclaves and process heating equipment, offering turnkey solutions for utility and process applications. An in-house engineering team supports design, supply, erection and commissioning.

Energy Pack has supplied Auxiliary Boilers to Naval warships including INS Kochi, Kolkata and Chennai, and is equipped to supply power boilers.

Energy Pack is conversant with the quality requirements expected by Naval Standards.

Certifications : Codes:
IBR (as required) | DGQA (as required) | ASME Sec VIII (as required) | PED (as required)

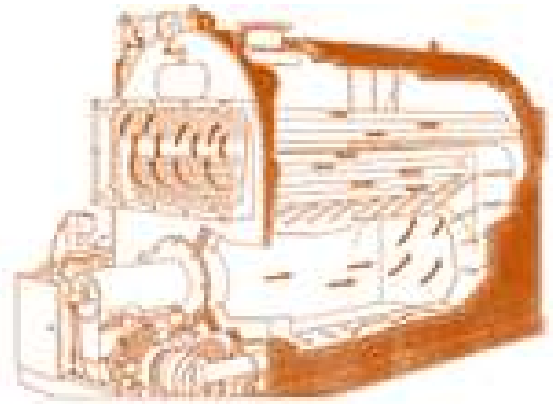
Power Boilers High-capacity boilers for power & large process loads

High pressure / high output configurations

Economizer / heat recovery integration (optional)

Designed for continuous duty operations

Key Specs: 10–45 TPH | up to 110 bar(g) | Sat./Superheated (project-specific) | IBR/ASME (as required)



Auxiliary Boilers
Compact steam generation for plants & utilities
Fuel: Oil / Gas / Solid / Biomass (as required)
Automation-ready controls & safety interlocks
Efficiency-focused design, rugged construction
Key Specs: 0.5–20 TPH | up to 45 bar(g) | IBR / DGQA (as required)

High Pressure Autoclaves
Pressure vessels for curing, sterilization & Dewaxing process
Working pressure: up to 20 bar(g) | Temperature: up to 220°C
Electric / steam heating options
Uniform pressure & temperature distribution
Key Specs: ID 1–5 m × L 6–40 m | Steam/Electric | ASME Sec VIII / PED (as per the requirement

Composite Autoclaves
For aerospace/industrial composite curing cycles
Vacuum & pressure-capable systems (as required)
Recipe-based cycle control & data logging
Thermal uniformity + rapid ramp rates (as required)
Key Specs: ID 1–6 m × L 3–30 m | up to 10 bar(g) | PLC recipe + data logging | Vacuum (as required)

Core Leaching Autoclaves
For core removal / leaching processes in foundry & precision casting for Aerospace & Defense requirements
Process-specific agitation / circulation options
Material of construction as per chemistry
Designed for repeatable cycles and safety
Key Specs: 0.5–20 m³ | 6–16 bar(g) | CS/SS/Clad/Rubber-lined (as required)

EXIDE INDUSTRIES LIMITED

Marine Business - Equipment / Services

Submarine Battery

Type – I For EKM Class of Submarine

Type-II for SSK and Arihant Class of Submarine

Type – III for Foxtrot and Romeo Class of Submarine

Type-IV for Scorpene Class of Submarine

For more than seven decades, Exide has been one of India's most reliable brands, enjoying unrivalled reputation and recall. Our constant emphasis on innovation, extensive geographic footprint, strong relationship with marquee clients and steady technology upgradations with global business partners have made us a distinct frontrunner in the lead-acid storage batteries space for both automotive and industrial applications. Exide designs, manufactures, markets and sells the widest range of lead acid storage batteries in the world from 2.5Ah to 20,600Ah capacity, to cover the broadest spectrum of applications. Using the latest technological inputs, we manufacture batteries for the automotive, power, telecom, infrastructure projects, computer industries, as well as the railways, mining and defence sectors. We specialize in manufacture and supply of Submarine Battery for all class of submarines domestically as well as internationally.

Certifications: : ISO 9001:2015,
ISO 14000: 2015,
ISO 45001:2018

FORBES MARSHALL PVT. LTD

Marine Business - Equipment / Services

- **Forbes Marshall deal with various products such as Control & Industrial valves, Boilers, Steam systems, Flow and level monitoring, Vibration Monitoring, Stack Emission monitoring, Vibration Monitoring, Pressure gauges, Control systems, and much more.**
- **Our group comprises multiple subdivisions that specialize in distinct product offerings to effectively address customer requirements.**

Forbes Marshall helps build and sustain highly efficient plants by reducing waste, optimizing process and energy efficiency, and by complying with regulatory requirements.Since the beginning, Forbes Marshall set out to create a unique company culture, passing down the wisdom from previous generations while looking toward the future with the spirit of innovation. This philosophy has always been partnered with our values; acting as our anchor, our guiding light, and our blueprint. Simply put, they are our legacy. Each value at Forbes Marshall guides and influences every interaction, from our members to customers, vendors and our wider community.

Certifications : ISO 9001:2015, ISO 14000 : 2015

NAVAL EQUIPMENT Steam Pressure Regulating Unit(SPRU

SPRU is a control valve which automatically maintains the downstream pressure of the steam as per the requirement (Set pressure). The valve is operated by a hydraulic actuator with the help of control water. The control signal to actuator is provided by the Directional control valve(DCV). This is a mechanical valve without any electronic components

CONTROL VALVES

Wide range of valves for precision control, pressure reducing and desuperheating and safety. Our valves are suitable for high pressure and high temperature applications in power plants, oil and gas, chemicals, petrochemicals, paper, sugar and steel.

Valves play a critical role in controlling the flow of fluids, gases, and slurries in industrial operations. By controlling pressure and preventing backflow, valves enhance the safety of industrial systems, preventing accidents and equipment damage.

We also offer desuperheating valves and pressure reducing systems for optimal steam management. Built from high-quality materials, these robust solutions can withstand harsh operating conditions, reducing maintenance requirements and enhancing process efficiency.

FLOW METERS

The wide range of products and solutions for the measurement of pressure, flow, temperature and analysis finds applications in almost every industry. Our process measurement expertise backed by our strengths in project management make us the preferred supplier to some of the largest projects in the region.

Measurement of parameters like flow, level, pressure and temperature in industrial operations is critical. It plays a vital role in ensuring efficiency, safety, and reliability across various processes.

GAUGES

Forbes Marshall gauges combine theaccuracy, simplicity and reliable monitoring, even under harsh conditions to ensure precision monitoring.

This range includes pressure transmitters, temperature transmitters, thermocouples, level gauges and pressure switches

BOILERS

Steam is the major source of thermal energy for the process industry, accounting for 5% to 40% of total processing cost based on industry segment. Efficiency and effectiveness at the point of generation are crucial for ensuring uninterrupted production processes, maintaining product quality, and optimizing energy.

Forbes Marshall offers a wide range of boilers that incorporate advanced technologies with enhanced control to ensure optimum performance at rated efficiency, safety, and environmental compliance. Be it oil and gas or solid fuel fired or waste heat recovery boilers, our boilers deliver steam at the lowest possible cost, both at the point of generation as well as at the point of consumption.

Garden Reach Shipbuilders & Engineers Ltd

Marine Business - Equipment / Services

RSE Diesel Engine Plant, Ranchi

Main Propulsion Engines
Licensed production of MTU s4000 diesel engines for Naval application

Diesel Alternators
Marine diesel gensets for Naval ships and commercial marine

Portable Steel Bridges
Single/ Double-lane portable steel bridges, Bailey bridges, Suspension bridges, Portable pedestrian assault bridges

GRSE- Diesel Engine Plant (DEP

GRSE- Diesel Engine Plant (DEP) was established in the year 1969 with the sanction of Govt of India to give a fillip to diesel engine manufacturing in India.

During formative years, DEP was engaged in manufacturing of large bore diesel engines for the Indian Armed Forces and other Governmentalestablishments in collaboration with MAN, Germany. Subsequently in the year 1982, DEP teamed up with M/s RRS GmbH (erstwhile M/s MTU, Friedrichshafen, Germany) and ventured into manufacturing and overhauling of high speed mtu engines and diesel gen sets in India.

Today, Indian Navy and Indian Coast Guard are the primary customers of GRSE-DEP with large number of diesel engines powering the ships and submarines.

Certifications: ISO 9001:2015

MTU Diesel Engines

The MTU diesel engines are used onboard vessels of Indian Navy and Coast Guard for main propulsion and power generation. DEP hosts the capability/ infrastructure for localised assembly, testing, commissioning and rendering after-sales support for some of the MTU s4000 diesel engines. Engines assembled at DEP are currently fitted onboard various vessels of the Indian Navy & Coast Guard.

Today, Indian Navy and Indian Coast Guard are the primary customers of GRSE-DEP with large number of diesel engines powering the ships and submarines.

Diesel Gensets

DEP provides marine diesel gensets for military as well as commercial marine applications. The 1000 KW gen sets assembled at DEP are Type Approved by DGQA for power generation onboard Naval vessels. Facility for assembly, testing and commissioning the gensets ranging up to 2000 KW are available at DEP.

1000 KW Gen Set Installed in Acoustic Enclosure

Portable Steel Bridges

GRSE is a leading designer and manufacturer of various types of portable steel bridges in the country. The bridges manufactured at GRSE, Kolkata and DEP are being widely used by the Indian Army, BRO, NHIDCL and various State Governments. These bridges are also delivered to our neighboring countries like Bangladesh, Bhutan, Nepal, Myanmar and Sri Lanka. GRSE has also received Green Channel Certification from DGQA for the Portable Steel Bridges.

Double Lane Modular Steel Bridge

Marine Business - Equipment / Services

- Water-tight and Gas-tight Doors
- Water-tight and Gas-tight Hatches
- Emergency Escape Scuttles and Hatches
- Hydraulic Sliding Doors
- Pressure Type Doors and Hatches for Submarine

A Legacy in Engineering

Godrej & Boyce Mfg. Co. Ltd. (G&B) is the flagship company of the Godrej Group, one of India's most respected and longstanding industrial conglomerates. Established in 1897 in Mumbai, the company emerged from India's Swadeshi movement and has since played a pivotal role in shaping the nation's industrial landscape. With its headquarters at Pirojshanagar, Vikhroli, Mumbai, Godrej & Boyce operates across 10 diverse industries, ranging from aerospace, defence, clean energy, railways, and automotive engineering to consumer products such as appliances, furniture, and security solutions

Water-Tight and Gas-Tight Hatch

Godrej watertight Hatch is a precision-engineered access solution designed to prevent the entry of water into critical compartments. Built to withstand harsh marine and industrial environments, this hatch delivers complete sealing performance under high pressure, ensuring safety, operational efficiency, and structural protection.

Certifications : ISO 9001:2015,
ISO 14000 : 2015,
ISO 45001:2018 etc.

Water-Tight and Gas-Tight Door

Godrej Watertight Door is a high-performance safety barrier designed to prevent the ingress of water, ensuring maximum protections. Engineered for extreme durability and reliability, this door maintains structural integrity even under high water pressure, making it essential for vessels, engine rooms, cargo holds, offshore rigs, power plants, and other critical infrastructure.

Emergency Escape scuttle and Hatch

- Godrej Emergency Escape Scuttle is a critical safety access point designed to provide rapid, reliable escape during emergency situations onboard ships, offshore platforms, and industrial facilities. Engineered for durability and watertight integrity, the scuttle ensures secure evacuation from enclosed areas while preventing water ingress under harsh environmental conditions.

Electro-Hydraulic Water -Tight Sliding Door

- Godrej Electro-Hydraulic Sliding Door is an advanced access solution engineered for high-safety environments where fast, smooth, and reliable door operation is essential. This door uses a powerful combination of electric controls and hydraulic actuation to deliver seamless operation, superior sealing, and maximum safety performance.

PRESSURE TYPE DOORS AND HATCHES FOR SUBMARINE

- Godrej pressure-Tight Door and Hatch is a mission-critical structural component engineered to maintain compartment integrity inside a submarine. Designed to withstand extreme hydrostatic pressure, shock, and vibration, these doors safeguard crew, equipment, and systems by isolating compartments during emergency conditions such as flooding, fire, or pressure imbalance. Built with precision and strict compliance to naval standards, they provide unmatched sealing performance and operational reliability in the most demanding underwater environments.

Govardhan Das P. A. (Calcutta)

Marine Business - Equipment / Services

- Reliable Valves
- Precision Castings
- Non-Ferrous Castings
- Engineering Fittings

A Legacy in Engineering

Established in 1966, Govardhan Das P.A. (Calcutta) has been a pioneer in the manufacturing of industrial and marine valves, non-ferrous castings, and engineered fittings for over five decades. From powering India's shipyards to supplying critical components for defense and infrastructure, GDPA has remained a trusted name in precision manufacturing.

Certified Quality You Can Trust

Our ISO 9001:2015 certified Quality Management System, under IRQS, ensures that every valve, casting, or fitting is built with consistent attention to quality, documentation, and performance. We've maintained ISO certification since the year 2000 — regularly upgraded to meet evolving industry standards.

Trusted & Approved

We are officially approved by:
Director General of Quality Assurance (Warship Projects), Ministry of Defence, Government of India
American Bureau of Shipping (ABS)
Indian Register of Shipping (IRS)

IRCLASS Indian Register of Shipping

ABS

Valves

- Valves Materials: Gun Metal, Nickel Aluminium Bronze, Cast Steel, Cast Iron, Stainless Steel, Forged Steel
- Gate Valve, Globe Valve (St. & Rt. Angle, Check Valve (Swing, Flap, Lift), Foot Valve with Strainer – All Upto
- 600NB Ball Valve (Upto 150NB) Butterfly Valve (Upto 1000NB)
- Diaphragm Valve (Upto 200NB) Cocks / Plugs (2 & 3 Way) (Upto 350NB)
- Storm Valve (Upto 200NB) Pressure Reducing Valve (Upto 150NB)
- Pressure Relief / Safety Valve (Upto)
- 300NB)
- SOS / Quick Closing Valve (Upto 100NB)

Pipe Fittings

- Materials: Gun Metal, Nickel Aluminium Bronze, Phosphor Bronze, Cast Steel, Forged Steel
- Marine Heavy Duty (MHD) & General Heavy Duty (GHD) Fittings
- Ermetto Fittings
- Scupper Head and Gratings Sounding Deck Scuttle / Sounding Pipe & Hinge Cap

Strainers

- Materials: Gun Metal, Nickel Aluminium Bronze, Cast Steel, Cast Iron, Stainless Steel, Forged Steel
- Simplex / Box Strainer (Upto 600NB)
- 'Y' Type Strainer (Upto 250NB)
- Duplex Filter (Upto 350NB)
- Mud Box (Upto 300NB)
- Rose Box / Strum Box (Upto 150NB)

Fire Hydrant & Air Vent Heads

- Fire Hydrant Materials: Gun Metal, Nickel Aluminium Bronze.
- Straight / Oblique Type A, Type Approved

(40NB, 50NB, 65NB & 75NB)

Air Vent Heads - Material: Mild Steel.

- Ball float type valve (Type Approved, upto 200NB)

Bushes for Stern Gear / Rudder Bearing

- Materials: Gun Metal,
- Aluminium Bronze

Anchors

- Materials: Cast Steel, Fabricated Cast Steel
- Stockless Bower Anchor (Upto 1000 Kg)
- AC14 HHP Stockless Anchor (Upto 1000 Kg)
- Danforth Anchor (Upto 1000 Kg)

Flanges

- Materials: Gun Metal, Cu-Ni, Aluminium Bronze, Forged Steel, Mild Steel, Stainless Steel
- Slip On Flange
- Blank Flange Stud
- FlangeWeld Neck Flange
- Composite Flange

Rigging Items

- Materials: Cast Steel, Forged Steel, Fabricated Steel
- Fairlead
- Panama Chocks
- Bull Ring Horn
- Cleats Bollards
- Naval Pipes

All products can be supplied under inspection of DQA (WP), ABS, IRS, LRS, RINA or any other classification society.

- AESA RADAR (MPR)

About HAL:

HAL is a premier aerospace company under MoD, GoI, with its Corporate Office at Bangalore. The company has 20 production divisions and 11 Research and Design Centres spread across the country.

HAL had its origin in 1940 founded by industrialist Seth Walchand Hirachand to manufacture aircrafts. Over past 85 years, HAL has spread its wings to cover areas of Design, Development, Manufacture and Overhaul of advanced fighters, trainers, helicopters & transport aircrafts and associated aero engines, accessories, avionics & airborne systems. It has also diversified into manufacturing of structures for space vehicles like Polar / Geostationary Satellite Launch Vehicles, Indian Remote Sensing and other Satellites, Industrial & Marine Gas Turbines as well as Commercial Services at HAL Airports at Bangalore &Nasik.

Certifications:AS9100D, AS9110C, ISO14001, ISO45001, ISO50001, ISO27001, ISO20000-1, Nadcap, NABL, CAR-21, CAR-145, CAR-147

Elgi Sauer compressors for the Indian Navy

High-pressure compressed air solutions up to 400 Bar for the most extreme naval requirements. Our water- cooled & air-cooled , high-pressure compressors are proven worldwide in exceptionally tough applications. They are operational in major global navies and sup- plied to major projects of the Indian navy such as INS Vikrant, INS Visakhapatnam class, INS Nilgiri class, ASW corvettes to name a few. The compressors meet all naval requirements such as shock resistance, low- est noise & vibration and sea state conditions provid- ing reliable operation over the life of the vessel.

HAL Aircraft Do-228 to Indian Navy

Do-228 is a highly versatile, multi-role twin-turboprop utility aircraft manufactured by Hindustan Aeronautics Limited (HAL) at its Transport Aircraft Division facility in Kanpur. This fuel-efficient platform, developed to meet diverse operational requirements of the Indian Defence Forces, incorporates advanced technology for short take-off and landing (STOL), long range operations in high altitude conditions, and rugged terrain performance.

HAL Helicopter ALH-MKIII
Maritime Role (MR)to Indian Navy

ALH MKIII, (Dhruv) designed and developed by HAL is a multi-role, multi –mission, new generation helicopter in the 5.5 ton weight class to meet FAR standards. It is designed to meet the requirements of both civil and military operators. ALH (Dhruv) is powered by two Shakti Engines with sufficient power margins for single engine performance and CAT 'A' take-off and landing capability. ALH has Composite structures, hingeless main rotor, bearingless tail rotor and anti resonance isolation system.

It is fitted with indigenous avionics as Radio Communication System, Radio Altimeter, IFF, Air Data Unit, Solid State Digital Video Recording System.

ALH Mk-III (MR) can equip with roles equipment such as Emergency Floatation Gear, Harpoon system, Sonar Locator Beacon, Rescue Hoist (Electric), Auxiliary Fuel Tanks (Cabin Mounted), Search Light, Crew & Passenger Life Rafts, Surveillance Radar, Electro-Optical Pod, Medical Intensive Care Unit, Automatically Deployable Emergency Locator Transmitter, Automatic Identification System, SAR Homer, Loud Hailer, Rescue Basket, High Intensity Search Light etc. as per customer's operational requirement.

ALH (Dhruv) has proven its mettle for versatile operations viz. search and rescue, causality evacuation, aerial surveillance, under slung load, offshore operation, VIP movement, commuter travel, troop transport, logistics & EMS etc. ALH is in operation in Nepal, Mauritius and Maldives.

HAL has its dedicated Helicopter MRO facility at Bangalore.

Information about the Product 1
ST-5000 System

The ST-5000 System is a 5 KW HF Digital Radio Transmitter, operating in the 1.5 to 30 MHz frequency range. ST-5000 provides Transmission of high-speed data and facsimile in addition to conventional voice and low speed teletype communications.

Information about the Product 2
Identification of Friend or Foe (IFF-MkXII)

The IFF Transponder¬(IFFT) is an airborne electronic identification equipment to transmit unique identifier code of the aircraft when interrogated by other friendly aircraft's interrogator, thereby establishing its friendliness.

IFFT is an airborne state-of-the art MK-XII transponder as per STANAG 4193 and ICAO Annex-10 Standard. The system supports Mode 1, 2, 3/A, C and Civil Mode S Level 2 features as per STANAG 4193, ICAO Annex-10 Standard and ADS-B Out feature as per RTCA DO-260B standard.

Platforms:Dhruv, Dornier 228, P8, Kamov 28

Information about the Product 3
Combined Interrogator and Transponder (CIT)

Combined Interrogator and Transponder (CIT) - is a IFF MK XII system designed and developed for Airborne application to identify friend or foe (IFF). These systems are essential in the battlefield to positively identify enemies andfriends.

CIT is a state-of-the-art system to cater for both military and civil aircraft requirements. CIT can Interrogate the designated target and at the same time it can respond to the interrogations received from other Interrogators to provide its identity.

Platforms:Kamov 31, MH 60R

Distance Measuring Equipment (DME)

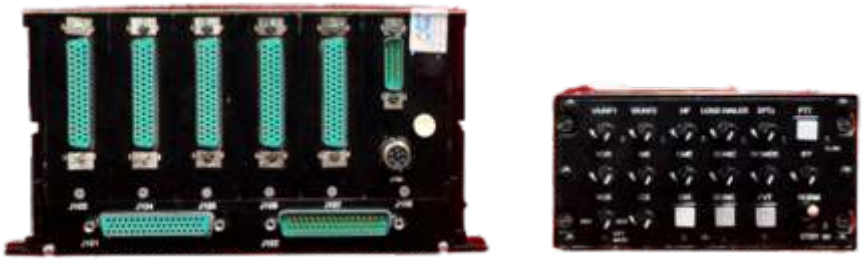
An airborne Light weight navigation system that provides slant range distance information of the aircraft from selected ground station and audio signals which identify the selected ground station. The range in nautical miles indicates the distance of the aircraft from the surface beacon. This system is capable of tracking 4 Stations simultaneously and provides Beacon identification facility through audio and station ID code on ARINC 429 Bus.
Platforms:Kamov 28, Dhruv

VOR - ILS

VOR-ILS systems provide today's flight crew with dependable, highly accuratebearing and landing information. This real-time system enhances operational safety during all -weather approaches and Landings.
Platforms:Kamov 28, Dhruv

Digital Audio Management Systems (DAMS)

DAMS provides intercommunication between Flight Crew and Ground crew. Also provides interface and control for Transceivers, Receivers and Warning receiver audios.
DAMS implements mike & audio signal conditioning in digital domain using digital signal processing techniques. DAMS has robust Voice Operated Switch (VOS) for hands free intercommunication. It is compact, modular and light weight system. AMS has reliable dual redundant functional channels for safe operation.
Platforms:Dhruv, Dornier 228, UHM



Multimode Navigation System (MNS)

An airborne integrated navigation system, VOR Receiver for route navigation (108.00 to 117.95 MHz), ILS Receiver for Instrument Landing (LOC: 108.10 MHz to 111.95 MHz & Glide Slope: 329 MHz to 335MHz) and MARKER Receiver (75MHz) for Run way approach. This system meets FM broadcast Immunity requirements as defined in ICAO Annex 10.

Data & Video Recording System (SSDVRS)

Solid State Data and Video Recording System (SSDVRS) is anairborne equipment which has six video input channels, two audio input channels, two MIL STD 1553B bus channels and two RS422 channels. All channels will be recorded simultaneously for 4 hrs continuously. System has one video output with dual redundant for in flight replay of selected video channel by pilot.
Ground Replay Station (GRS) provides facility to download therecorded video, audio and data along with event markers fromthe Removable Memory Module (RMM) for replay and analysis
in a time synchronized manner during post flight debrief.
Platforms: UHM

Radio Altimeter

An airborne light weight, FMCW based Digital Radio altimeter operating in C – Band and measures the altitude of the aircraft. It is basic Piloting equipment that provides an accurate indication of the height of the aircraft above the terrain over which it is flying. This system employs Digital signal processing techniques, for accurate altitude measurement.

Platforms: UHM, Dornier 228, Dhruv, Kmaov 28

TACAN

ADVANCED TACAN (Tactical Air Navigation) is a polar coordinate type radio air
navigation system that provides aircrew with range and bearing (azimuth)information on the ARINC429 / MIL 1553B Bus for display on the MissionComputer/CDU. Using this information, pilot can fly directly to particular location oruse the bearing and distance from a specific beacon to fix his geographic location.The range in nautical miles indicates the distance of the aircraft from the surfacebeacon. The bearing indicates the direction in degrees with respect to MagneticNorth.
Platforms: UHM

Marine Business - Equipment / Services

D-LEVEL REPAIRS

Fully Equipped to undertake component level repairs of radar microwave modules of ELTA products

MAINTENANCE SOLUTIONS

Comprehensive expertise in managing CAMC/AMC services, delivering seamless maintenance solutions with guaranteed uptime, optimized performance.

TECHNICAL STRENGTHS

Troubleshooting & Repair: Electronic and RF Modules

Integration testing & Inspection Technical Training & Field Support Inventory Management & Warehousing, ATE Maintenance

UPGRADATION/MODIFICATION OF ELTA PRODUCTS

Expertiseinradar upgradation and modification solutions, enhancing system capabilities, extending operational lifespan

IT & SOFTWARE

Dedicated team for design & development of software for aerospace and defense

HELA Systems is an Indian subsidiary of IAI ELTA and was established with the aim of providing customers with a fast, professional, and efficient response by building in-country capabilities for repair and manufacturing. The company provides comprehensive and end-to-end maintenance solutions for Radar systems, including depot-level (Level D) repair capabilities as well as on-site support for Radar and supporting systems, THROUGH highly skilled & experienced engineers / technicians.

Support to Indian Defence ServicesHELA, undertakes complete MRO activities for all its products supplied to the Indian Defence forces and other govt organizations.

Vision - To emerge as the largest D-Level repair/ manufacturing center in India for a wide range of electronic & RF Modules and test equipment's.

Certifications : EN 9110:2018
ISO 450001 :2018

What Sets Us Apart?

EXPERIENCED TEAM - More than 100 OEM trained technicians and engineers supporting critical & sensitive projects 24 x 7 x 365

DOMAIN EXPERTISE - One stop solution for Maintenance, Repairs, Overhaul, Spares, Testing & Training

LOGISTICS SUPPORT -Seamless logistics support through efficient supply chain network pan Indiawithin domestic tariff area and bonded MOOWR warehouse

REDUCED TAT - Advanced repairs, overhauls and upgrades to always ensure reduced TAT and system peak performance

SECURITY AND CONFIDENTIALITY COMPLIANCE (SMLDI: 2025 complaint) - HELA implements organizational, physical and cyber security control in line with MoD SMLDI 2025 compliance

USP/ Advantages

HELA with its pool of OEM qualified manpower, cutting edge technology and a robust logistics network offers one stop solutions for all aspects of radar maintenance.
HELA comes with the following USP in this niche field of radar MRO services:
Capability enhancement
Mission critical readiness
Life cycle expertise
Modular Upgrades and custom retrofits
MOOWR enabled cost efficiency
Single window sustainment partner

"Turning Service
Into Success"

Operations Blueprint

Operations Blueprint
Technical manpower deployment 24x7x365 for asset management
Preventive and breakdown maintenance in accordance with IAI procedures
Card level fault isolation, repairs and functional testing in ESD safe labs and ATE's
Calibration and certification of test equipment's
Upgrades and retro fitment towards performance enhancement

Johnson Controls India Private Limited

Marine Business - Equipment / Services

- Magnetic Bearing Compressor based AC Plant (80 TR to 1100 TR)
- AC Plants (Open & Semi hermetic Screw): 80 TR to 800 TR
- Fire Fighting Systems: CO2, FM200, Novec
- Refrigeration Plants
- HVAC Systems
- Self-Contained Units (SCU)

Johnson Controls is a global leader in creating smart, healthy, and sustainable buildings, backed by over 140 years of innovation and engineering excellence. With global revenues exceeding USD 25 billion and a workforce of 100,000 experts across more than 150 countries

Johnson Controls India Pvt. Ltd. (JCIPL), headquartered in Pune, has been operational since 1995. With a world class manufacturing facility located in Pune, the Marine & Navy division is supported by dedicated service setups strategically positioned at Naval Dockyards inVisakhapatnam, Karwar,Kochi, Kolkata, Mumbai

Certifications:ISO 9001:2015, ISO 14000 : 2015,

Our Products

Johnson Controls has supplied a wide range of mission critical Naval systems—to several frontline platforms of the Indian Navy viz Indigenous Aircraft Carrier – INS VikrantShivalik class Frigates, Kamorta class ASW Corvettes, Kulish Class,Talwar &Teg class Frigates and Kolkata Class,

Magnetic Bearing Compressor based AC Plant (80 TR to 1100 TR)

AC plant is designed to deliver exceptional performance in mission critical environments. Lightweight, quiet, and highly robust, perfectly suited for advanced naval vessels and offshore platforms.
The plant is specifically engineered to
Our Magnetic Bearing AC Plants have been successfully installed and commissioned across multiple Indian Naval platforms for over 11 years, consistently demonstrating reliable performance, minimal maintenance, and superior lifecycle efficiency

AC Plants (Open & Semi hermetic Screw): 80 TR to 800 TR

Engineered to comply with stringent military standards—including NSS II Shock Grade, Air-Borne Noise (MIL-STD-1474E),and Structure-Borne Noise (MIL-STD-740-2).
nstalled on frontline Indian Naval platforms. Our 85 TR AC Plant is now DGQA Type Approved,

CO2 Fire Fighting System

Johnson Controls CO_2 Fire Fighting System is a trusted and proven solution for comprehensive onboard fire protection across naval and marine environments. Installed and commissioned across multiple Indian Navy and Indian Coast Guard platforms

Refrigeration Plants

The Refrigeration Plants from Johnson Controls are engineered and purpose-built for naval applications, these systems are compact, rugged, and optimized for continuous, mission-ready operation.
Comply with key naval and military performance criteria, including:

- NSS II Shock Grade
- Air-Borne Noise

(MIL-STD-1474E)
Structure-Borne Noise
(MIL-STD-740-2)

HVAC Systems

Johnson Controls provides end-to-end design, supply, installation, and commissioning of TACS-based HVAC systems for a wide range of naval vessels—from agile P28 ASW Corvettes to the prestigious Aircraft Carrier class.

All equipment offered within the TACS-based HVAC system is designed to be Compact , Modular – and Naval-grade– engineered for the unique space and performance constraints of modern warships

Johnson Controls' HVAC solutions also incorporate Air Filtration Units tailored for Nuclear, Biological, and Chemical (NBC) warfare protection, ensuring crew safety and ship survivability in contaminated environments.

Our HVAC systems comply with key naval performance requirements, including Shock Grade standards, Structure-borne noise requirements and Air-borne noise criteria

Johnson Controls TACS-based HVAC systems are operational on several frontline Indian Navy ships, including P17 Shivalik-class frigates, P28 Kamorta-class ASW corvettes, P-71 Aircraft Carrier – INS Vikrant

Self-Contained Units (SCU)

Johnson Controls offers a comprehensive range of Self-Contained Units (SCUs) from 1 TR to 40 TR, purpose-engineered to meet the demanding air-conditioning requirements of both surface ships and submarine platforms.

Our SCUs operate on HFC refrigerants, fully compliant with Kyoto Protocol environmental standards, ensuring reduced environmental impact without compromising cooling efficiency. The systems are engineered for Simple installation in constrained naval spaces, Low-maintenance operation and High energy efficiency for optimized shipboard performance. Johnson Controls SCUs are designed to meet stringent naval specifications, including Shock , Structure-borne noise limits and Vibration performance criteria

Johnson Controls SCUs have been successfully installed and commissioned across high-visibility Indian Navy platforms such as Kamorta-class ASW Corvettes and Aircraft Carrier – INS Vikranta

Interface Unit for Automated Weather Observing System

SUBMARINE ECHOSOUNDER -Mk1

It is a navigational echo sounder for measuring water depth below keel of a submarine. Operating depth of the submarine is up to 300m. SES MK-1 meet the depth requirement of 0.2m to 6000m.

SUBMARINE ECHOSOUNDER-MK2

It is a navigational echo sounder for measuring water depth below the hull and diving depth above keel of a submarine. Operating depth of the submarine is up to 1000m. SES MK-2 meet the depth requirement of 0.2m to 10000m. A smart high frequency 1MHz is used for shallow depth measurements.

EMLOG

EM Log is a speed and distance measuring equipment to measure single axis / dual axes speed through water (STW) with a speed accuracy of ± 0.2 knots < 10 knots and 2% above 10 knots

RETRANSMISSION UNIT

Retransmission Unit provides individually configurable / buffered RS422, RS232 NMEA channels. It is also built to cater to user specific analog and digital interface requirements. i.e., Synchro, Resolver, DC / AC Linvar, Fregat, Kasu etc.

PROCESSOR BASED GROUND MINE (PBGM

The processor based ground mine is an advanced ground mine for laying either by surface ship or submarine up to 300m depth in water

HOMING SYSTEM TORPEDO

It is an underwater active transmitter system for torpedo, which consists of 52 channels Class-D power amplifier with hybrid backplane. Transmission Frequency is 21kHz with power level of 200W per channel.

TOWED ARRAY - ALTAS

Towed Array for ALTAS is an array having 160m sensor array with 600m heavy tow cable & 250m light cable along with the Optical inter connection module

SEA BED ARRAY

P215-Sea bed arrays are offboard passive sensor arrays of 5m length with a Cable length of 5m. Deployed on the sea bed mounted on stainless steel frame, for monitoring stratergic locations at sea on a continuous basis to assess the threats from submarines and submersibles. .

UWACS TRITON

UWACS Triton is a compact under water acoustic communication system with multiple communication modes. It is used for communication between ships and submarines, between ships and between submarines. It is based on SDR architecture, hence it is very flexible for future

UWACS MICRO

UWACS Micro is portable and versatile equipment used for testing all functionality of Underwater Wireless Acoustic Communication System. Ergonomic and Compact single enclosure design. Comprehensive GUI for configuration and operation.

DATA DISTRIBUTION UNIT

Data Distribution Unit is an interface unit between Ring Laser Gyros / INS – SA with various Navigation and Fire Control System Onboard. It can provide different type of Digital, Analog and Proprietary signals.

ADVANCED INDIGENOUS DISTRESS SONAR SYSTEM (AIDSS

Advanced Indigenous Distress Sonar System is an emergency sound signaling device or beacon sonar which transmit acoustic signals of pre-designated frequency and pulse shape in an emergency situation typically SUBMISS or SUBSUNK

SONAR POWER AMPLIFIERS

Two types of Sonar Power Amplifiers available viz. Linear and Digital with built in Over load and Over Current protection, Remote ON/OFF facility and FDFL. They are manufactured using MOSFET/IGBT based PWM full Bridge configuration for Digital and Hybrid ICs for Liner Power Amplifiers

DIFAR SONOBUOY

DIFAR Sonobuoy is an A size passive sonobuoy having DIFAR, OMNI and GPS sensors. It has got three operating modes viz. DIFAR, DO and SO. Operational life is 8 Hrs and is selectable via Command Function Select.

AIDSS TRANSDUCER

AIDSS Transducer is a transceiver having tuned frequency from 4.5 kHz to 9 kHz. It can operate at a depth of 1500m.

UCS ARRAY

UCS Array is a dual band communication transceiver array having tuned frequencies of 6 kHz and 9 kHz. It can operate at a depth of 450m. It has an Omni directional beam pattern.

UCS TRANSDUCER ELEMENT

UCS Transducer is a dual band communication transceiver having tuned frequencies of 6 kHz and 9 kHz. It can operate at a depth of 450m.

UWT TRANSDUCER ELEMENT

UWT Transducer is a single band communication transceiver having tuned frequency of 9 kHz. It can operate at a depth of 20m

FREE FLOODED RING TRANSDUCER

Free Flooded Ring Transducer is a single band transceiver having tuned frequency of 5.5 kHz. It can operate at a depth of 300m.

NACS STAVE

NACS Stave is a single band transceiver having tuned frequency range of 2 kHz to 12 kHz. It can operate at a depth of 20m. It is used for health monitoring purpose.

MAAREECH TOWED ARRAY

UCS Transducer is a dual band communication transceiver having tuned frequencies of 6 kHz and 9 kHz. It can operate at a depth of 450m.

OWN NOISE ANALYSER

UWT Transducer is a single band communication transceiver having tuned frequency of 9 kHz. It can operate at a depth of 20m

CAVITATION METER

Free Flooded Ring Transducer is a single band transceiver having tuned frequency of 5.5 kHz. It can operate at a depth of 300m.

TX-ATR

NACS Stave is a single band transceiver having tuned frequency range of 2 kHz to 12 kHz. It can operate at a depth of 20m. It is used for health monitoring purpose.

ACTIVE SONAR TRANSMITTER SYSTEM

Sonar Transmitter system for various sonar applications onboard Ship / Submarines.

INTERFACE UNIT FOR AWOS

Interface unit provides data output in MIL1553/GHOST, Ethernet and Rs422 interface formats, for a frontline Naval ship.

HMS/BMS INDICATOR PANEL

This is a subsystem of Sonar designed to monitor various parameters of the system.

Founded in 1958 by Shri. Shantanurao Kirloskar, erstwhile Kirloskar Pneumatic Company Limited is at the helm of the Kirloskar Group companies. With our manufacturing legacy that goes back more than 130 years, we proudly hold the baton for industrial innovation.Committed to deliver solutions that surpass our customers' expectations, we continually evolve to develop our offerings. That's how we ensure that Kirloskar Pneumatic is consistently at the cusp of innovation, raising the standards of the industry and establishing robust relationships with leading global organisations.

Certifications : ISO 9001 : 2015,
ISO 14001:2015,
ISO 45001:2018
ASME 'U' Stamp certification

MAGNETIC BEARING COMPRESSOR AC PLANT 160 TR

For Water Chilling for Air Conditioning / machinery coolingfor surface Ships, Submarines and land based Naval application

AC PLANT 80 TR – IINS ADITYA CLASS, KORA CLASS SHIP, SNF CLASS

- For Water Chilling for Air Conditioning / machinery cooling

for surface Ships, Submarines and land based Naval application

- Shock resistance as per Naval Standards (rugged design with optimized shock mount selection)
- Vibrations (SBN) well within limits of Naval Standards
- Noise (ABN) well within limits of Naval Standards.
- Compact in size to accommodate in minimum spaceand foot print

AC PLANT 80 TR – IINS ADITYA CLASS, KORA CLASS SHIP, SNF CLASS

- Refrigeration Plant for Cold Rooms And Cool Roomsfor preservation of vegetable, fruits, dairy products
- Shock resistance as per Naval Standards (rugged design with optimized shock mount selection)
- Vibrations (SBN) well within limits of Naval Standards
- Noise (ABN) well within limits of Naval Standards.
- Compact in size to accommodate in minimum space and foot print
-

AC PLANT 760 TR–VIKRANT CLASS Indian Air Craft Carrier

- For Water Chilling for Air Conditioning / machinery cooling

for surface Ships, Submarines and land based Naval application

- Shock resistance as per Naval Standards (rugged design with optimized shock mount selection)
- Vibrations (SBN) well within limits of Naval Standards
- Noise (ABN) well within limits of Naval Standards.
- Compact in size to accommodate in minimum space and foot print

Marine Business - Equipment / Services

Integrated Platform Management System (IPMS)- Main Product

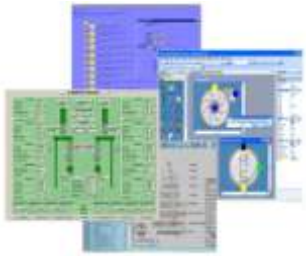
This fully integrated system provides operators real-time information on theplatform, enabling decision-makers to operate more effectively, particularly in emergencies, by integrating the monitoring and control of the ship's propulsion, electrical, functions, auxiliariesanddamagecontrol machinery and system

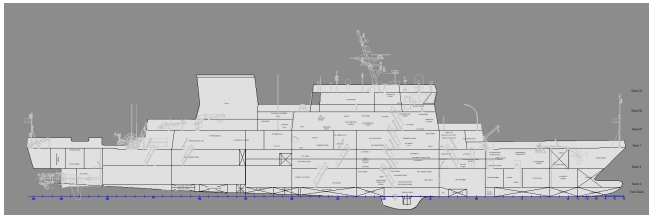
L3 Harris Maritime and Aero Private Limited is a group company of L3 Harris MAPPS Inc, the global leader in providing IPMS. This is in turna subsidiary of L3Harris Technologies Inc,USA, theleading supplier of defense, space and security solutions. L3Harris Maritime and Aero Pvt Ltd,has been established in India for more than 25 years and has provided advanced and complex automation solutions to frontline naval warships of Indian Navy. The office in India also serves more than 13 friendly Navies around the globe.

Certifications: ISO 9001:2015

Our Products

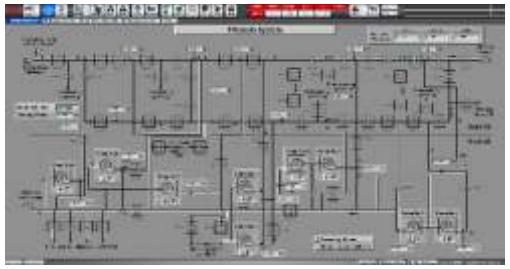
Integrated Platform Management System(IPMS)integrates the monitoring and control of the ship's propulsion, electrical functions, auxiliaries, and damage control machinery enabling the operators to take the decisions faster and efficiently run the platform equipment onboard the ship.





Battle Damage Control System (BDCS)

Battle Damage Control System provides vital Damage control features such as Stability calculator, Fire and Flood Detection and management and to enable user to effectively manage the ship compartment wise controls



Automated Power Management System (APMS)

The ship's Power generation and distribution automation functions can be handled using the IPMS or as a separate APMS.

Onboard Training System (OBTS)

The OBTS provides a virtual environment for training close to real life scenarios for the operators of IPMS. This can be run and used onboard without having to run the main machinery to ensure seamless training of new operators / refresher training etc.

LM2500 Gas Turbine Controller (ECU) - FADEC

L3Harris ECU for LM2500 Gas turbines has been installed on platforms like P71 Aircraft Carrier, P17A Nilgiri class and also Shivalik class ships.

L&T Valves Ltd

Marine Business - Equipment / Services

Gate Valve Globe Valves, Check Valves, Cryogenic Valves Bellow Sealed Valves Trunnion MountedBall Valve F loating Ball Valve
Triple Offset Butterfly Valve
Aqua seal Elastomer LinedB utterfly Valves

Green Channel Certification
Green Channel Status was granted to L&TValvesLtd.byDirectorateGeneral of Quality Assurance (DGQA) on 22 September 2025 for a period of 5yearsupto22September2030forthe following range of products:

1.TripleOffsetButterflyValve(4"- 14")
2.Swing CheckValve(2"-10")
3.Top Entry Floating Ball Valve(3/8"-3")
4.Lift CheckValve(3/8"-1.1/2")
5.SDNR Valves(1"-1.1/2")
6.SDSLV alves(3/4"-4")
7.Gate Valve(14")
8.Double Offset Butterfly Valve (2")

L&T Valvesis a leader in flow-control solutions. The company is a subsidiary of Larsen & Toubro, a technology and engineering conglomerate. L&T Valves has supplied over 20 million valves, enabling efficient and reliable flow control across industries worldwide. L&T Valves leverages its heritage of excellence that spans six decades to manufacture valves for key sectorsoftheeconomy such as oil& gas, power, petrochemicals, chemicals, water, as well as defense and aerospace.

Technology and innovation are a part of the corporate DNA, and each product that bears the L&T brand comes with a promise of trouble-free performance. Globally, L&T Valves is a preferred supplier for cryogenic, low-emission, large-size, and high-pressure valves, as well as advanced valve automation solutions including HIPPS.

Certifications
Green Channel Status
ISO9001:2015,14001:2015&45001:2018
CE Marking & ATEX
API600,603,6D,609&594
SIL-3TMBV,FBV,TOBV,Gate&GlobeValves.

Our Products

L&T Valves manufactures a focused range of industrial valves including bolted bonnet and pressure seal gate, globe, and check valves, floating ball valves up to 8" in ASME Classes 150–2500,API6D–compliantrunnion-mounted ball valves with SIL-3 capability, and butterfly valves(TripleOffset,Aquaseal,andFabricated) up to 100" and ASME Class 1500. These valves are produced using advanced manufacturing processes, stringent inspection andtestingcontrols,andaresuppliedincarbon steel, stainless steel, and alloy steels for demandingserviceconditionsacrossoil&gas, power, and process industries.

Valves for Shipyard

L&T Valves has successfully supplied a wide range of critical marine valves to Indian shipyards, including Mazagon Dock Shipbuilders Limited (MDL), for Project-17 Alpha Frigates (P17A).

AspartoftheP17Aproject,L&Thasdeliveredvalves conforming to stringent naval and shipbuilding specifications, meeting requirements for long service life in aggressive marine environments. The scope of supply included valves manufactured in Gun Metal, NAB, and other naval-grade alloys, suitable for seawater, firefighting, ballast, bilge, cooling water, and auxiliary systems.
L&T ensured full compliance with requirements related to material traceability, NDT, hydrostatic and seat testing, PMI, an documentation, supporting the high reliability and safety expectations of frontline naval combat vessels.
L&T Valves Ltd. has a proven track record of supplying more than 2,500 valves for warship and naval vessel applications.

L&T is a US$30 Billion Engineering & Construction conglomerate operating in over 50 countries worldwide. Its Precision Engineering & Systems (PES) IC has been a trusted partner to the Indian Armed Forces for over 4 decades, supplying critical components as well as platforms to meet the nation's defence requirements, in marine, land as well as air domains. PES IC also provides critical components and systems to India's space program through its Aerospace segment.

PES IC's Marine Equipment & Systems (MPES) unit supplies naval platforms as well as equipment to the Indian Navy, Indian Coast Guard as well as to customers in friendly foreign countries.

PES IC's Shipbuilding unit operates an ultra-modern greenfield shipyard, spread across over 900 acres, at Kattupalli near Chennai.

Product

Offshore Patrol Vessels

OPVs are medium to light armed, steel hulled vessels intended to protect offshore assets and island territories. 7 of these have been designed, built and delivered to the Indian Coast Guard.
They are capable of ocean policing, control, surveillance and monitoring.
They are designed to operate up to sea state 7 and undertake helo operations, thus functioning as 'eyes in the sky'. Peacetime capabilities include fisheries protection and monitoring as well as operations pertaining to anti-smuggling, anti-piracy, limited pollution response against oil spills, and search-and-rescue operations.

L&T SOV

The L&T SOV is a special operations diesel-electric midget submarine, designed and developed by L&T-PES. Fitted with twin torpedo tubes and with modern conformal array SONAR & advanced radio electronic sensors for detection, surveillance, communication and interception, L&T SOV offers credible deterrence as well as capabilities for deployment and recovery of special forces.

Key Features

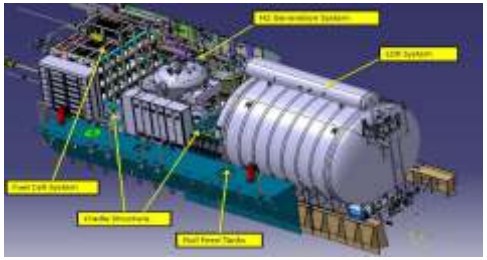
- Length: 54 m
- Pressure Hull Diameter: 4.8 m
- Maximum Operating Depth: 150 m
- Operating Speed: 12 Kn (submerged), 10 Kn (snorkel), 8 Kn (surfaced)
- Complement: 13 Crew, 12 Special Forces Operators

Air Independent Propulsion (AIP)

Air Independent Propulsion (AIP) provides a non-nuclear alternative to the conventional diesel-electric Submarines to enhance their endurance by allowing them to recharge batteries underwater. This AIP system, which runs on indigenously developed PAFC (Phosphoric Acid Fuel Cell) based technology, can be configured to integrate on existing as well as future conventional Submarines. L&T is the recipient of ToT (Transfer of Technology) from NMRL-DRDO for AIP for Submarines as well as Industry Partner for engineering & realization of the AIP System. L&T is undertaking execution of two AIP System Modules for Kalvari Class of Submarines for the Indian Navy.

Key Features

- Maximum Power: 300 KW
- Dimensions: Length 11.5m, Diameter 6.2m
- Fuel: Hydrogen Oxidant: Oxygen



Submarine Escape Training Facility

The facility is designed to train submarine crew using an SEIE MK 11 escape suit, simulating escape from a damaged or sunken Submarine. It includes a Submarine Escape Training Tower comprising two chambers - Tower Escape (simulating an undamaged submarine compartment) and Rush Escape (simulating a damaged, flooded submarine). The tower escape is equipped with systems, equipment and fittings to facilitate flooding, draining, pressure equalising, built-in breathing, a stole-charging valve to inflate the SEIE MK 11 escape suit, etc. The rush escape chamber is integrated with the RCC to cater to any decompression emergency. The entire facility is controlled from control room. There is a provision for emergency/ urgent draining.

Next Generation Helo Harnessing &Traversing System (NGHHTS)

The NGHHTS offers a safe and user-friendly system to Secure and Traverse Helicopters on Naval Platforms without manual intervention.

Deck handling system for performing helicopter securing and traversing operations onboard frontline naval platforms.

Specifications:

Capture Time: Less than 03 seconds

Traversing Speed: 0.01 to 0.3 m/sec

Automated Operations: No personnel required on helo deck for operations.

Capture area: 3 m (longitudinal) X 1.8 m (lateral)

Environmental Capability: can be used for operations in sea conditions upto Sea State 5

Helicopter Compatibility: Compatible with Tri-cycle / Reverse Tri-cycle type of Helicopters mounted with a probe with Max AUW of upto 12.5 tons.

ASW Rocket Launcher

The ASW Rocket Launcher is a ship-based anti-submarine rocket launch system, capable of firing 12 radially arranged, depth-charge rockets at submerged targets.

Salient Features:

- Firing modes: Single rocket, Salvos of 4, 8 and 12 rockets.
- Rocket Feed Complex caters to storage and automatic loading of rockets into the launcher
- Hoist and Conveyor mechanism customizable for platform-specific requirements.
- The rocket is an unguided depth charge with maximum range of 5.5 km and maximum depth of 300 m.
- Specifications:
- Number of Tubes in the Rocket Launcher : 12
- o Rocket Range (max.) : 5.5 km
- Launcher Overall Dimensions (approx.) :
- Length : 2140 mm
- Width : 1880 mm
- Height : 2410 mm

BRAHMOS Launcher & Fire Control System

L&T Precision Engineering and Systems, in collaboration with BAPL, has designed, developed, and manufactured Launcher Modules for the BRAHMOS Missile System for naval platforms in vertical, inclined and quad configurations. The Fire Control System (FCS), designed, developed and manufactured by the Company, is capable of simultaneously controlling 2 to 32 missiles in single or salvo mode. The FCS accepts target data from a radar or Combat Management System and calculates the missile's trajectory. Major functions of the FCS include Missile Preparation, Missile Health Check, Hit Probability Calculation and Cartographic Display.

Salient Features:

Inclined, Vertical & Quad configuration
Carries out Combat & Route Planning
Single and Salvo firing
Facilitates Missile Health checks
Built-in test facility

Autonomous Underwater Vehicles

The facility is designed to train submarine crew using an SEIE MK 11 escape suit, simulating escape from a damaged or sunken Submarine. It includes a Submarine Escape Training Tower comprising two chambers - Tower Escape (simulating an undamaged submarine compartment) and Rush Escape (simulating a damaged, flooded submarine). The tower escape is equipped with systems, equipment and fittings to facilitate flooding, draining, pressure equalising, built-in breathing, a stole-charging valve to inflate the SEIE MK 11 escape suit, etc. The rush escape chamber is integrated with the RCC to cater to any decompression emergency. The entire facility is controlled from control room. There is a provision for emergency/ urgent draining.

Cadet Training Ships

A ship capable of providing comprehensive Sea Training to Naval Cadets, it can perform secondary roles as a Hospital Ship, Humanitarian Aid and Disaster Relief (HADR), Non-Combatant Evacuation Operations (NEO) and Search & Rescue Operations (SAR).

Heavyweight AUV Amogh: Tailored for deep-water bathymetric and seabed surveys, the Amogh AUV is configurable with SSS, SBP, MBES, and MA-SSS payloads, with an endurance of 24 hrs.

Marine Business - Equipment / Services

- Below mentioned items which we have supplied to MO's & defence PSU's.
- Damage Control Items
- Fabricated assemblies
- Pressure end fittings(ferrous & Non ferrous)
- Gas turbine spares
- Deck spares for Aircraft carriers

HAMEENA ENGINEERING INDUSTRIES, is based in Bhopal, and is a trusted name in Precision Machining & Fabricated Assemblies. With 36 Years of rich experience, the company has been delivering high-quality machined & fabricated assemblies to various industries , including critical defence sectors . Over the years , the company has earned a reputation for its commitment to quality , innovation and reliability

Certifications: ISO 9001:2015, AS9100D

SHORING BEAM HATCH DOOR FIXED TYPE-II

Dan Buoy Steel Modified

-With pressure testing at 65Psi & buoyancy testing supplied to MO(MBI)

Damage Control Items

We have been supplying these items to MO's & Defence PSU's

Damage Control Items

Deck Spares

Currently we have developed Flight Deck Rims for
INS Vikramaditya which bears load upto 20 Tons at vertical direction

Gas Turbine / Compressor Spares

A.Fasteners

B.Ferrous & Non Ferrous Gaskets
Damage Control Items
A.Stopper with 3 grips

B.Splinter Box (All Sizes)

C.Circular Stopper Plate with fittings

D.Shoring Beams

E.Band multipurpose (20-200mm Dia Pipes)

Pressure End Fittings

A.Unions
B.Flanges
C.Extenders
D.Adaptors /Couplings
E.Branch Unions

Fabricated Assemblies

A.Dan Buoy Steel Modified
B.Shoring Hatch components
C.Hose Basket
D.Dan Buoy Steel Modified
E.Shoring Hatch components
F.Hose Basket

Marine Business - Equipment / Services

- Tank Level Indication System
- HMI Display Panels
- Local Tankside Display
- Level Switch & Transmitt
- Addressable Flood Alarm System
- HMI Display Panels
- Flood Transmitter
- Flood Switch
- Flow Measurement
- Flowmeter for Water
- Oil Flowmeter
- Flow Rate Totaliser& Indicator
-

Company Profile - More than 45 yrs of experience in designing and manufacturing instruments for measurement of process parameters.

Approved vendor to the Indian Navy for over 20 years. 4000+ instruments installed onAircraft Carrier, Destroyers, Frigates, Corvettes, FACs, Survey Vessels, OPVs, Barges

Products are Indigenously Designed, Developed & Manufactured (IDDM).

Lifetime support for all our products.

Certifications& Approvals
ISO 9001: 2015, DGQA Registered, R&D recognised by Ministry of Science &Technology, GoI, ESS Compliant Electronics

Flow Rate Indicator & Totaliser

For remote indication of Flow rate and Totaliser

Isolated current output

Programmable relay output

Selectable units of measurement

Level Transmitter

For continuous level measurement of all types of liquids
Submersible and non-submersible application
Suitable for Hazardous, Corrosive, High Temperature application
Available in Titanium construction for Ballast Tanks
Long term reliable operatio

HMI Display Panel

Centralised display of multiple tanks
Touch screen display of Tank details – Level / Mass / Volume
Connectivity with IPMS
User defined Tank Groupings
Rugged – SS construction

Local Tankside Display

Standalone display for each tank
Digital Display of Level / Mass / Volume with graph
Analog & Digital Outputs
Connectivity with IPMS
Long-Distance High-Speed data transmission

Flood Transmitter

For measurement of Rate of Flood
Suitable for submersible applications
Fast response
Connectivity with IPMS

Flood Switch

For detection of Flood Level
Addressable switches
Maintenance free, no moving parts
Connectivity with IPMS
Potential free relay outputs
Compact & Rugged – SS construction

Flow Meter for Water

For measuring the flow of Water, Sea Water, Chilled Water
Rugged design
High accuracy
Maintenance free, nomoving parts
Built-in Totaliser
Bi-directional Flow Measurement

Oil Flow Meter

For measuring the flow of Oil, Fuel
Suitable for highly viscous fluids
Compact in size
High accuracy
Available in SS316 construction

Tank Level Indication System

Complete system for measuring tank contents of Ballast, Water, Lube Oil, Fuel Oil & AVCAT Tanks.
Tank High-Low & Bilge Level Detection.
The system comprises of:
HMI Display Panel
Local Tankside Display
Level Switch & Transmitter

Addressable Flood Alarm System

Complete system for measuring Flood Level & Rate of Flood
The system comprises of:
HMI Display Panel
Flood Transmitter
Flood Switch

OMEGA INDUSTRIES PVT LTD

Marine Business - Equipment / Services

White metal lined bearings & bearing Pads for Indian Navy for SNF, EKM, DMDE, Cochin Shipyard, P-17, Talwar & PGSC Projects etc.

Plummer Block & Gear Box Bearings

S3 & S4 (G546 & G548)

Omega Industries Pvt Ltd is original manufacturer (OEM) of White Metal Lined Sleeve Bearings since 1960 for Electric Generator, Motors, Pumps, Steam, Gas & Hydro Turbines and Gear Boxes as per customer drawing & design

We manufacture White Metal Lined Bearings & Bearing Pads up to 1000 MW Steam, Hydro Gas Turbines for BHEL, Alstom, GE Power, Siemens, SKODA & Indian Navy.

We are Exporting to Waukesha Bearings, USA & UK with self-certification.

We use virgin, high purity, lead free (Pb < 0.05%) white metal which enhances working temperature upper range by almost +150C and also the specific loading capacity of the refurbished Bearing.

Our made Turbine, Generator Bearings & Seal Rings lead to vibration free operation of customer's critical power equipment for decades.

Certifications& Approvals
ISO 9001:2015 & ISO 14000:2015
OMEGA awarded Best Supplier Award by BHEL Varanasi, Bhopal
Voith Turbo Gmbh
Certificate of Excellence awarded by BHEL Haridwar

PTC INDUSTRIES
ASPIRE • INNOVATE • ACHIEVE

PTC INDUSTRIES LTD

Marine Business - Equipment / Services

- Titanium and Nickel Alloys Mill Ingots, Billets, Rods and Bars, Plates & , Sheets
- Valve Castings , Online Fittings, Propeller, Pump Diffusers etc.

PTC Industries Limited is a leading Indian engineering and advanced manufacturing company specializing in high-quality precision components and complex castings for critical and super-critical applications. With over 56 years of manufacturing expertise, the company has built robust capabilities in delivering high-integrity components to sectors such as

Defence, Aerospace, Naval & Marine, Oil & Gas, Energy, and Industrial Equipment.

PTC Industries is globally recognized for its excellence in near-net-shape castings and

fully machined components, produced using advanced and proprietary manufacturing technologies including Investment Casting, Centrifugal Casting, Replicast®, RapidCast™, and ForgeCast™. The company works with a wide range of high-performance materials—alloy steels, stainless steels, duplex & super-duplex grades, nickel- and cobalt-based superalloys, and titanium alloys—enabling it to consistently meet stringent mechanical, metallurgical, dimensional, and inspection requirements.

For Naval and Defence applications, PTC

Industries supplies critical components for marine propulsion systems, pumps, valves, structural assemblies, and mission-critical equipment, all manufactured in accordance with applicable Defence Standards, Naval/Class Society requirements, and Quality Assurance protocols.

Certifications:ISO 9001:2015 – Quality Management Systems
ISO 14001:2015 – Environmental Management Systems
ISO 45001:2015 – Occupational Health & Safety Management Systems

The company holds approvals from major classification and inspection bodies and follows robust quality systems to ensure complete traceability, reliability, and manufacturing consistency.

The company has established advanced

capabilities in high-technology materials and processes, particularly for titanium and superalloy castings used in strategic Defence and Aerospace platforms. PTC Industries actively contributes to India's indigenisation, import substitution, and self-reliance initiatives, and works closely with Defence PSUs, DRDO laboratories, and various government agencies.

PTC Industries Limited is committed to precision, quality excellence, and technological innovation, making it a trusted and long-term manufacturing partner for the Indian Navy, DRDO, and other Defence establishments requiring reliable, high-performance components for demanding operational environments.

Ingots

PTC Industries produces high performance Titanium and Nickel alloy mill products, including ingots, billets, rods, bars, plates, and sheets specifically for critical aerospace, defense, and naval applications.

Valve Castings

PTC manufactures high-integrity valve castings designed for pressure regulation, flow control and shut-off functions in naval fluid systems. These are produced using investment casting, Replicast®, RapidCast™ and ForgeCast® processes with materials including Titanium, and Nickel Aluminum Bronze (NAB). The near-net-shape casting process achieves uniform wall thickness, minimal machining allowance, and high dimensional accuracy, critical for marine and subsea environment.

Applications in Naval Equipment:

Sea water ballast and cooling systems

Propeller

On-line fittings from PTC are precision cast and machined components used to interconnect pipes, valves, and systems within naval fluid and propulsion networks. These include elbows, tees, reducers, flanges and adaptors that maintain structural integrity under high pressure and corrosive marine environments. The company's casting technologies enable fittings with tight tolerances and excellent metallurgical properties suited to salt-water service.

Applications in Naval Equipment:

Main and auxiliary piping networks

Online Fittings

PTC supplies fixed-pitch propellers and blades for naval and marine platforms manufactured by precision casting in alloys like Nickel aluminum bronze (NAB). These cast propellers are engineered for high thrust efficiency, corrosion resistance and fatigue strength in demanding sea conditions.

Applications in Naval Equipment:

Surface warship and patrol vessel propulsion systems.

Corvettes, frigates and support ship propulsion.

Auxiliary craft and small boat drive systems

Diffusers

A diffuser is a precision-cast and machined component used in centrifugal pumps and marine pumping systems. It surrounds the impeller and guides the fluid flow from the high-velocity swirling flow at the impeller outlet into a more uniform, pressure-stable, radial direction to match the pump discharge. In naval applications, diffusers are critical for efficiency, reduced cavitation, stable head performance, and long service life in harsh marine environments.

Applications in Naval Equipment:

Sea water cooling and fire water pumps.

Bilge, ballast, and ballast transfer systems.

Fuel and lubrication transfer systems

SAURABH METALS PVT LTD

Marine Business - Equipment / Services

- Shafting
- Anchor
- General Casting
- Forging

SAURABH METALS PVT. LTD., was established in the year 1985 and have been continuously growing with our forward integration approach. Our Company is equipped with state-of-the-art integrated facilities of Melting, Casting, Forging and Machining. We being competitive, ensuring best selection of raw material & technology inputs and passionate adherence to excellence have made us one of the most trusted entities in India's Casting and Forging Industry.

We are amongst the few manufacturers in country having melting, foundry, forging and CNC machining facilities under one roof which helps to maintain the quality from raw material stage to finished product and thereby meeting delivery requirements.

Our product range includes Ferrous Castings from 50 kg – 25 MT single piece, Open Die Forging upto Dia 600mm – 8MT single piece and Close Die forgings upto 1500 kg under IS/ASTM/DIN/EN/SAE/GOST and equivalent standards, Carbon / Alloy /Stainless steel grades.

Our foundry is acknowledged by esteemed organisations like RDSO who have approved us as Class 'A' foundry. We are a "WELL KNOWN FOUNDRY" accredited by Central Boiler Board, New Delhi based on our sound our in-house testing facility, conducting Chemical, Mechanical, Metallurgical analysis, Non-destructive Testing, meeting customers technical requirements by our qualified & experienced Technicians & Engineers.

Certifications: ISO 9001-2004, ISO 14001-2004 & OHSAS 18001-2007.

Main Product Services

Shafting
(various type of forged shafts)

SHREE GAJANAN PROPULSION MARINE SERVICES PVT LTD

Marine Business - Equipment / Services

PRODUCTS MANUFACTURED

- Propellers
- Tail Shaft Assemblies
- Couplings
- Shaft Seals
- Stern Tube Assemblies
- Cutlass Bearings
- Stern Tube Glands
- P, A, V & Y Brackets
- Rudder Assemblies
- Nozzles
- Tunnel Thrusters
- AFT & FWD Bosses
- Steering Systems
- Energy Saving Device (ESCAP)
- Energy Saving Swirl Duct

Future Vision

To expand in-house manufacturing capabilities for machining marine propellers up to 6 meters in diameter with a finished weight of up to 12–13 tons, thereby supporting indigenous naval and maritime requirements.

Shree Gajanan Propulsion Marine Services Pvt. Ltd. is a well-established marine engineering company with 49 years of experience in the design, manufacture, and supply of marine propulsion and stern gear systems. The company is supported by a skilled team of design engineers using modern design and drafting tools, along with in-house design and manufacturing capabilities.

SGP Propulsion provides propulsion systems for a wide range of vessels including RORO ferries, tug boats, oil barges, passenger vessels, fast patrol boats, bulk carriers, dredgers, cargo vessels, yachts, and fishing boats.

We complete propulsion solutions covering system design, detailed drawings, classification approvals, manufacturing, classification surveys, and supply of equipment to optimize vessel performance.

Certifications: ISO 9001: 2015
Manufacturing facilities approved by IACS classification societies: IRS, BV, DNV, ABS, LR, RINA, NKK, BKI

Our factory is equipped with comprehensive in-house facilities, including:

- Design and Engineering Department.
- Foundry Shop.
- CNC/VMC Machining Shop.
- Grinding Milling and Polishing Shop.
- Advanced 3D Pattern-Making Shop.
- Fabrication Shop.
- Quality Inspection and Assurance Departments.

Propellers:
We design and customize a wide range of propellers up to 4.2 M, including:

- Super Cupped Propeller Series
- High Skew Cambered Propellers
- S-Class Propellers
- Custom-Built Propellers
- High Skew Kaplan Propellers

Tail Shaft & Stern Gear Assembly:

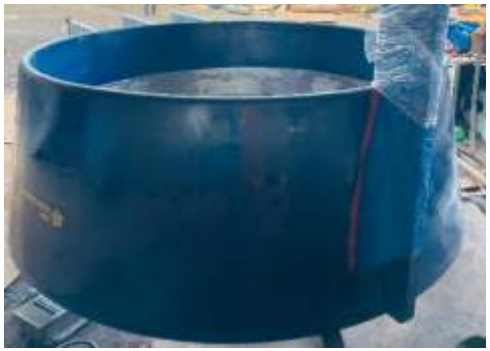
Transmits engine power to the propeller, supports the shafting, and ensures smooth, efficient, and watertight operation of the propulsion system.

Rudder & Rudder Stock:

The rudder provides directional control and steering of the vessel, while the rudder stock transmits steering forces from the steering gear to the rudder blade.

Nozzles:

Propeller nozzles are used to improve thrust efficiency, especially for vessels operating at low speeds, heavy loads, or in towing and maneuvering conditions.



Energy-Saving Swirl Duct & Energy Saving

CAPimproving propulsion efficiency and reducing fuel consumption.

Shree Refrigerations Limited

Marine Business - Equipment / Services

Magnetic Bearing Chillers:
A compact, low-noise chiller engineered for marine applications, delivering high reliability, energy efficiency and smooth, vibration-free performance.

Submarine Air Conditioning:
A Compact, self-contained air-conditioning systems engineered for submarines, ensuring silent, reliable cooling under submerged, mission-critical conditions.

Turnkey HVAC:
End-to-end marine HVAC-R solutions-from design and manufacturing to commissioning and lifecycle support-fully compliant with Indian and global naval standards.

Value added Heavy Fabrication:
Delivering engineered, mission-critical structures and integrated assemblies for India's defence, naval and strategic infrastructure needs.

Shree Refrigerations Limited is a leading Indian company with over 35 years of expertise in defence-grade HVAC and refrigeration. Known for its award-winning Made in India solutions and strong focus on indigenisation, the company develops technologies built for the most demanding naval and marine environments. Committed to delivering reliable, efficient and customized systems, Shree Refrigerations plays a vital role in strengthening India's defence capabilities and the mission of Atmanirbhar Bharat. Trusted by the Indian Navy, it remains the only Indian company with naval registrations across Chillers and Refrigeration Plants, Turnkey HVAC & R Solutions, and Electrical Control Panels.

Value-Added Heavy Fabrication Shree Refrigerations' Heavy Fabrication Division provides expertly engineered structural and fabricated assemblies for defence, naval, and strategic infrastructure applications. Our facilities are equipped for fabrication, machining, surface treatment, and assembly under stringent quality and inspection requirements. Supported by Indian Navy-certified welders and skilled professionals, we deliver complex projects with high accuracy, consistency, and reliability. Registered with DGQA and aligned with the Make-in-India initiative, we support indigenous development through robust manufacturing capabilities, advanced engineering practices and comprehensive end-to-end project execution across critical mission-ready platforms and long-term strategic programs.

Certifications: ISO 9001:2015 - Quality Management System MSME ZED GOLD

Turnkey Marine HVAC-R Solutions:

Shree Refrigerations delivers end-to-end marine HVAC-R solutions for shipbuilding, defence and offshore sectors in India. Our services cover engineering design, equipment manufacturing, system integration, installation, commissioning and lifecycle support. All solutions are developed in compliance with Indian Navy, Coast Guard, IRS, DNV and ABS standards and optimized for tropical marine conditions. With strong in-house capabilities and experienced project and service teams, we ensure reliable execution, long-term system performance and responsive after-sales support for a wide range of vessel platforms.

Submarine Air Conditioning:

Shree Refrigerations designs and manufactures self-contained air conditioning systems specifically for submarines and advanced naval platforms. These compact units integrate refrigeration, air handling and control systems within a single enclosure to provide reliable cooling, dehumidification and air circulation under submerged operating conditions. Designed for low noise, low vibration and high reliability, the systems support critical compartments such as control rooms, machinery spaces and accommodation areas. Each unit is engineered to meet stringent naval standards and ensure continuous performance in mission-critical environments.

Magnetic Bearing Chiller: 50 TR to 300 TR

Shree Refrigerations offers advanced magnetic bearing chillers ranging from 50 TR to 300 TR, engineered for high efficiency and superior reliability in demanding marine applications. These oil-free systems deliver extremely low noise and vibration, making them ideal for sensitive onboard environments. The chillers feature compact, self-contained construction suitable for vessel installation, cleanable shell-and-tube condensers with seawater cooling and high-quality integrated components. Each unit is factory assembled, internally wired, fully tested and designed for easy installation and minimal maintenance.

AHU & Control Panels:

SRL has in-house expertise to design, develop and manufacture Air Handling Units and Contol panels for Naval HVAC applications. With this in-house capability, SRL does not have to depend on external suppliers thereby reducing overall manufacting lead time.

Simplex Castings Limited

Marine Business - Equipment / Services

The firm is engaged in the design, manufacturing, and supply of a wide range of engineered and heavy industrial products. Its product portfolio includes structural and fabricated components such as A Brackets, P Brackets, Rudders, and Bed Plates; defense and precision components like Gun Cartridges; metallurgical and plant equipment including Coke Oven Door Bodies and Sinter & Pellet Cars with complete assembly; cast iron and steel products such as Ingot Moulds; and infrastructure works like Rail Over Bridges (ROB) along with other customized heavy engineering products manufactured as per client specifications and industry standards.

SIMPLEX CASTINGS LIMITED

SIMPLEX CASTINGS LIMITED is a 60-year-old MSME-class engineering company listed on the Bombay Stock Exchange (BSE), strategically located in the mineral-rich central region of India. The company operates a ferrous foundry at Bhilai and a dedicated fabrication facility at Tedesara, catering to core industries such as steel plants, defense, railways, cement, sugar, power, earth-moving equipment, and mining. Its manufacturing capabilities include CI castings up to 55 MT, ductile (SG) iron castings up to 12 MT, and steel castings up to 8 MT. The fabrication facilities are equipped to handle technological structures up to 1,000 MT and equipment up to 250 MT. Well-established machine shops, comprising both conventional and CNC machines, support high levels of precision, consistency, and product quality across all operations.

Certifications: DQA(WP) / DGQA–approved foundry, certified by ABS, Operates under internationally recognized management systems including ISO 9001:2015 (Quality Management) and ISO 14001:2015 (Environmental Management).
Also an RDSO–approved Class "A" Foundry and is supported by NABL-certified laboratories

This is a fabricated steel rudder assembly comprising a welded rudder blade and a machined rudder stock with mounting flanges, designed to transmit torque and control directional flow. It is manufactured as per approved drawings with full traceability markings, ensuring dimensional accuracy and quality compliance. Such rudders are widely used in marine, water-control, and heavy industrial applications where reliable flow direction and structural strength are critical.

T-72 is a family of Soviet main battle tanks that entered production in 1973.The T-72 was a development based on the T-64 using thought and design of the previous Object 167M. About 25,000 T-72 tanks have been built, and refurbishment has enabled many to remain in service for decades.

Fabricated steel rudder assembly comprising a welded rudder blade and a machined rudder stock with mounting flanges, designed to transmit torque and control directional flow. It is manufactured as per approved drawings with full traceability markings, ensuring dimensional accuracy and quality compliance. Such rudders are widely used in marine, water-control, and heavy industrial applications where reliable flow direction and structural strength are critical.

A Bracket and P Bracket are critical structural support components primarily used in marine and heavy engineering applications. The A Bracket supports and aligns the propeller shaft between the stern tube and propeller, ensuring proper load distribution and shaft stability, while the P Bracket provides intermediate shaft support with a single-arm configuration, helping maintain alignment during operation. Both brackets are designed to withstand dynamic loads, reduce vibration, and ensure smooth and reliable power transmission in propulsion systems.

Stern boss casting is a large, crucial metal component for ships, forming the rear hull structure that houses the propeller shaft, supports the rudder, and reduces drag, typically made from robust steel or ductile iron through sand casting and certified by marine bodies like ABS or DNV.

STATIC TRANSFORMERS PVT. LTD.

Marine Business - Equipment / Services

- Transformers, Rectifiers, Battery Chargers, Gas Turbine Starting Rectifier (GRSR), Helo Starting Rectifier (HSR), Impressed Current Cathodic Protection (ICCP), High Power UPS

We are registered as a MSME unit since 1965.

Supplying Electrical Equipment to Indian Navy/Coast Guard and to Indian Shipbuilders along with other defense PSUs.

Inspite of being a MSME, we have experience of manufacturing many developmental equipment for Indian Navy, like replacing Russian Make GT Starting rectifier with Indigenized GTSR (duly Type tested and EMI EMC Tested).

We have also developed Ground Power Unit for Indian Air Force.

Our motto is to perform best manufacturing practices to contribute towards nation building.

Certifications& Approvals
UDYAM-MP-23-0015300

HSR – Helicopter Starting Rectifier

We are registered as a MSME unit since 1965.

Supplying Electrical Equipment to Indian Navy/Coast Guard and to Indian Shipbuilders along with other defense PSUs.

Inspite of being a MSME, we have experience of manufacturing many developmental equipment for Indian Navy, like replacing Russian Make GT Starting rectifier with Indigenized GTSR (duly Type tested and EMI EMC Tested).

We have also developed Ground Power Unit for Indian Air Force.

Our motto is to perform best manufacturing practices to contribute towards nation building.

Transformers

Supplying dry-type transformers to Indian Navy & Coast Guard for warships and submarines.
Most indigenized warships have our Transformers/BCU/HSR/GTSR on-board.
Supplied units (Type & EMI/EMC tested): 1KVA, 5KVA, 7.5KVA, 10KVA, 20KVA, 22.5KVA, 30KVA, 40KVA, 75KVA, 200KVA, 400KVA Auto.

GTSR -Gas Turbine Starting Rectifier

60/140KW rectifiers supply DC cycles to start gas turbines on Naval Warships, ensuring reliable engine operation.
Universal: Works with GTs of RE, SNF class ships & other DC motor-started turbines.
Converts 50Hz, 380V AC to DC for starter motor.
Two thyristor bridges: Channel I for armature, Channel II for excitation.
Control: Operable locally/remotely, regulates voltage & current.

ICCP: -Impressed Current Cathodic Protection

ICCPs are rectifiers that reverse electrolysis in seawater, protecting ships from corrosion.
Fitted on Indian Naval & Coast Guard ships (e.g., INS Betwa, INS Brahmaputra via GRSE, 2005).
Input: 440V ±2.5%, 3Ø, 50Hz, 3-wire.
DC Output: 8V, 100A.
Current limit: 125A max.
Control range: 0–100A

BCU –Battery Charger Units

24V, 30A / 60A / 130A
2.65KW Transformer Rectifier
Purpose: Supplies 24VDC to bus loads & charges batteries in float/boost mode.
Tap changer: 28V Boost, 24V Float.
Components: 3Ø step-down transformer, SCR bridge rectifier, control unit, DC filters.
Input stepped down & rectified; filters limit ripple; control regulates voltage/ current.

We are a Copper base alloy casting solution provider for all types of valves,pumps and engineering items since-2008. A copper based foundry which aims in serving "Quality with Deliverability", for some of the complex copper base alloys like Nickle Aluminium Bronze as per defence standards & global standards while providing casting solutions for end user.

Certifications:ISO 9001:2015, PED 2014, AD2000W0 Merkblatt

Butterfly Valve Disc

Butterfly Valve Body in NES 747

Castings done in Def Stan NES 747 Part 2 naval standard all activities witnessed under QAE inspection.

Pump Casing in NES 747 grade

Pump Casings for ships casted in NES 747 P2 naval standard under QAE inspection, with hydrotesting cleared.

Impeller for pumps in NES 747 grade

Impeller castings in NES 747 grade of both types single suction and double suction and well balanced condition.

Flowmeter in C95300 grade

Castings of Flowmeter body in multiple sizes in C95300 bronze alloy under QAE inspection.

Gears in C95400

Gears Castings done in C95400 grade with DP testing, heat treatment, radiography and UT testing before dispatch.

Y strainers in C95800

Y type strainers in C95800 grade after DP testing, Radiography, hydrotesting and flow testing.

Propeller Casting

Propeller castings in C95800 grade as per client specifications and application based.

Capabilities

1.Inspection room
2.Chemical analysis
3.Mechanical analysis
4.Surface treatment
5.QAE and 3.2 witness
6.Heat treatments
7.Prototyping
8.LPT testing
9.Ultrasonic Testing
10.Radiography testing

TEXMACO RAIL & ENGINEERING LTD.

TEXMACO RAIL & ENGINEERING LTD. founded in 1939 by Dr. K.K.Birla is apremier multi-discipline, multi-unit complex with its six Factories including Urla extendingover nearly 200 acres. TEXMACO is a leader in the manufacture of Wagons and RailwaySteel castings both domestic & export, Hydro-Mechanical Equipment, Industrial Structure forSteel Plant and Thermal Power Station. The Company has built up strong credentials throughits outstanding performance in prestigious, national and Internal Projects. The Company isexporting around 40% of castings on regular basis to the developed countries.

In the year 2019, TEXMACO has acquired Urla unit of Simplex Casting Ltd. and started supplying Steel Castings to various sectors like Indian Railways, Aluminium Plants, Defence, Earth Moving, Ship Building and Steel Plants etc. Urla Unit of TEXMACO is located in 26 acre land equipped with requisite modern infrastructure for production of steel castings with CNC machining facilities. A single piece casting of 35 MT weight can be cast in this unit. The unit is looking forward for development of Export Castings to American and European Markets.

The Foundry is located at Urla – Raipur is well equipped with manufacturing facilities for Cast Iron, S.G. Iron, Steel & Alloy castings for Heavy Engineering Plant, Steel plant, Mining Industries, Railways, etc. with modern CNC machining facilities.

The company has acquired necessary accreditations with ISO 9001: 2015, API, ASME, ABS, RDSO, AAR, TPG, etc. Urla plant is equipped with all approved physical & chemical testing facilities. "Customer satisfaction" is the main business motto of Texmaco. The unit is manufacturing and supplying castings to almost all core sectors industries like Steel mills, Aluminium smelter & downstream, metallurgical Plants, Railways, Power Plants, Valves & Pump Industries, Mining, Cement, Sugar, Heavy Earth Movers, Heavy Machine Building, Material Handling, Oil & Gas, Defence, Chemical plants, etc. upto their satisfaction.

Certifications: ISO 9001:2015,

STERN BOSS

The stern boss is a structural part located at the aft end of the ship, around the propeller shaft exit from the hull.

A-BRACKET AFT

The A-Bracket (Aft) is fitted outside the hull near the stern, closer to the propeller, behind the stern tube.

A-BRACKET PORT & STBD

Port and Starboard A-Brackets are installed on the left (port) and right (starboard) sides of the ship's stern, mainly in twin-propeller vessels.

P-BRACKET

The P-Bracket is fitted on the ship's hull near the stern, supporting the propeller shaft outside the hull.

Tocol Machine Tools Pvt Ltd

Marine Business - Equipment / Services

- Turbo Machinery Equipment and Assemblies
- Aerospace and Aeroengine Parts and Tooling
- Launch Hardware for Satellites, Cryogenic application parts, Propulsion hardware
- Power generation Equipment and Parts.

Tocol Machine Tools is a precision engineering and manufacturing company serving Critical applications in the Defense, Aerospace, Civil and Marine power generation segments. Our expertise lies in manufacturing high Precision machined parts and Assemblies and supported by a highly competent design team with the best in class design software.

Our Supply chain management sources raw materials in all possible configurations from Ferrous, Non-ferrous& Exotic alloys in Forgings, castings, rolled, Extruded as well as specialty wire forms, and from local to global sources. We handhold our customers right from design stage. Materials qualification, manufacturing, product verification to testing and installation on varied platforms, making us your best partner for Shipbuilding, Refit programs and Operations.

Certifications: ISO 9001:2015, AS9100D

Turbo Machinery

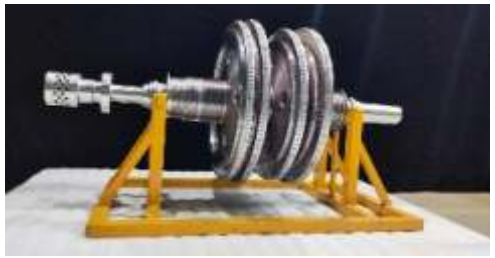
The Feed Condensate & Booster Transfer Pump is responsible for supplying Feed water to the Ship's Boilers and consists of a Steam turbine driving three Centrifugal pumps directly as well as in coupled mode. The turbine drives the Booster & Condensate pump by a double reduction helical gearbox. The Pump is built with various Protection and regulation devices for failsafe operation. These pumps are doing active duty on Carrier platform and have logged in significant running hours.

Pumps for Marine application

Centrifugal pumps Made in compliance per DME465.
Monobloc pumps built to withstands high Shock loads and exhibit low vibration. Manufactured for Naval duties of Fire suppression, Sea water, Feed water etc.
Range of pumps also include tailor made Piston pumps, Gear pumps and Reciprocating pumps.
Photo of the product 2

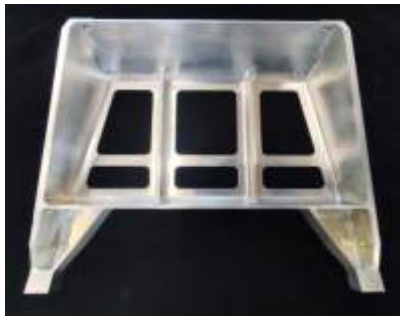
Powerg eneration Equipment & Rotors

Turbine Rotors of are manufactured for various duties of propulsion, power generation, driving auxiliary equipment like Forced Draught Blowers and Pumps. Rotors and blades are manufactured to precise tolerances enabling high speed operation. Rotor assemblies are balanced dynamically or at Full speed as demanded.
Photo of the product 3



Aerospace and Aeroengine parts

Our Excellent machining and measurement capabilities enable manufacture of high critical and mission critical Aerospace and Aeroengine Parts from Titianium, Inconel, Magnesium, Aluminium and Stainless Steel Alloys.



Tooling for Aeroengine Industry

Critical Tools and Fixture Assemblies are manufactured for various Aeroengine manufacture lines as well as Maintenance Repair and Overhaul (MRO) for Marquee Aeroengine manufacturers across the world.

Triveni Turbine Limited

Marine Business - Equipment / Services

Steam Turbine Manufacturer

Port & Starbord Turbine for INS Arihant, INS Arighat, S4 & S4*

Triveni Turbine Limited is one of the largest manufacturers of industrial steam turbines of up to 100 MWe and has emerged as one of the market leaders in the sub-30 MWe range. It has installed over 6,000 steam turbines (generating more than 16 GW power generation capacities) in 20 plus industries. We are present in over 80 countries around the world, and the steam turbines are manufactured at our world-class facilities located in Bengaluru (India), Houston (USA), and Pretoria (South Africa).

Our Aftermarket business, Triveni REFURB, works globally across all brands of rotating equipment, leaving a positive footprint on repair, spares, overhauling, efficiency improvements, etc, up to 950 MW. In its quest for growth, Triveni REFURB has entered new geographies such as Asia-Pacific and has penetrated new industry segments such as Geothermal and Gas Turbines.

Certifications : AS900D, ISO14001:2015, OHSAS45001:2018

Port & Starboard Turbine INS Arihant, INS Arighat, S4 & S4*

The unit consists of a steam turbine with an alternator and pump. The turbine is the impulse type with one two row velocity compound wheel and 11 pressure compounded wheels. The steam enters at one end of the turbine through a stop and emergency valve, and flows axially relative to the rotor to the exhaust end. Then enters in to a water cooled condenser, where it is condensed and returned to the boiler as feed water.

Vanson Engineering Pvt. Ltd

Founded in 1979 by visionary Mr. Chandru Soneji, Vanson Engineering Pvt. Ltd. has grown into one of India's most dependable marine engineering system & service providers. Headquartered in Vasai, near Mumbai, Vanson delivers technical solutions and after-sales support to India's maritime and industrial sectors with a commitment to precision, performance, and partnership.

Carrying forward this legacy, Mr. Navin Soneji, the second-generation leader, has infused the organization with a forward-thinking approach, expanding its horizons across new technologies, advanced solutions, and global collaborations. Under his leadership, Vanson has strengthened its position as a trusted partner for modern marine engineering requirements, blending tradition with innovation to meet the evolving needs of the industry.

Our strength lies in providing end-to-end engineering solutions, from project inception and equipment supply to commissioning and long-term service support. Backed by strategic partnerships with world-leading OEMs, Vanson ensures global standards, local execution, and seamless continuity across every client engagement.

With over 45 years of Engineering excellence, Vanson stands as a trusted partner for the Indian marine industry. Backed by a PAN India technical presence, trained & certified service engineers and expertise in emergency response, AMC & retrofits Vanson ensures custom engineering with Quick turnaround while staying true to its core values.

M/s VERTEX ENGINEERING SYSTEMS PRIVATE LIMITED

Marine Business - Equipment / Services

SUBMARINES & WARSHIPS EQUIPMENT:

- Hydraulic Machines with Actuators (Hydraulic & Pneumatic)
- Hull & Kingston with hydraulic Driven Valves
- HP Air System Equipment & Reducers
- Ventilation System Equipments (Vent/Flap Valves)
- Hydraulic Manipulators
- Signalisers(VPI)
- Filtration Systems Equipments (SWF/FWF, MoC: Titanium)
- Pumps for varied applications of Ships & Submarines
- Gas Turbine Fuel Equipments
- Torpedo Ejection System Equipments
- Fire Fighting Equipment & Sensors
- Diesel Engine fuel Injection Pumps and injectors

The firm has been associated with indigenous design, development and manufacture of critical assemblies, subsystems, and system level integration for Defence, Marine and Aerospace applications. The firm has developed wide range of products including Weapon and Counter-measure Launchers, Titanium Gas Bottles, all type of valves including for Special application (ReducingValves and Control Valves)manual and remotely operated (Hydraulic, Pneumatic, Electromagnetic, Electromechanical operation), equipment for High Pressure applications like pneumatic/hydraulic valves, Actuators, Hydraulic Machines and other complex equipment. The firm has indigenously (reverse engineering and concept based) developed precision and critical item like diesel engine and gas turbine fuel equipment, AUV and missiles,components and equipment for nuclear applications etc.

The firm has captive design and analysis capability including shock, vibration, ABN & SBN prediction and reliability to undertake in-housedevelopment of ab-initiofrom concept and through reverse engineering.

LP & Snorkel Exhaust Flap:

LP & Snorkel Exhaust Flap: A critical submarine component that controls the exhaust flow from the snorkel system, ensuring safe ventilation, maintaining compartmental pressure balance, and minimizing acoustic signature during submerged operations.

WEAPON/AEROSPACEEQUIPMENT:

Titaniumgasbottles:
are used for high-pressure air and inertgases storage in Aero space systems, offering excellent corrosion resistance, low weight, and long service life, making them ideal for Aero space applications. These products withstand pressure upto 1000 BAR Pneumatic.

High-Pressure Air System (Tank Side Blow Valve):

The tank side blow valve controls the release ofhigh-pressure(400 bar) airinto ballast tanks, enabling rapid submersion and surfacing of submarines while ensuring safe and reliable operation under extreme pressure conditions.

Sea Water Filter: Advanced filtration system

Advanced filtration system designed for submarines to remove impurities from seawater used in cooling, ballast, and auxiliary systems, ensuring reliable operation, corrosion resistance, and long-term durabilityin harsh marine environments.

Hydraulic Operated Machine

fitted inside submarine to operate the Kingston flap which are outside the submarine for flooding the main ballast tanks during diving and surface.

Ammunition,Warheads& AUVs:

EmptyWarheadAssemblies:Theseitems are used as air-launched anti-radiation missileusedtodetect,target,andneutralize enemy radar and air-defence systems, enhancing Suppression of Enemy Air Defence (SEAD) for capabilities for both Long-Range Surface-to-Air Missiles (LRSAM) and Short-Range Surface-to-Air Missiles (SRSAM). Only empty warhead assemblies manufactured by us shall be used for these applications.

GEAR
Marine gear box,Hydel gear box,Sugar mill planetary gear box,High speed gear box

DEFENCE
Missile Launcher For Road Rail Air Borne Under Water Rocket Motor Casing For Missiles.

CENTRIFUGAL
BATCH CENTRIFUGALS
WB-750, WB-1000, WB-1750,
CRUSHING & GRINDING
Ball Mills (Slide shoe/ Trunnion Bearings,Rotary Dryer For Slag.
FOUNDRY AND INSTRUMENTATIONS

Walchandnagar Industries Limited (WIL) is an ISO 9001: 2015, ISO 45001: 2018 & ISO 14001: 2015 certified Indian company with global presence and diversified business portfolio in Hi-Tech Manufacturing, Projects & Products. Carrying a legacy of 115+ years of Engineering Excellence, WIL has established its name as one of the best in its operational areas.

WIL is known for pioneering achievements in Indian engineering industry and for its contribution to nation building activities.

WIL has a strong engineering, project management and manufacturing infrastructure to undertake projects and supply of machinery and equipment, in the fields of Nuclear Power, Aerospace, Missile, Marine & Industrial GearboxesDefence, Cement Plants, Process Equipment, Foundry, Centrifugals&

Instrumentation.

WIL has a large proven reference list of satisfied customers across the world.

MAIN PROPULSION GEAR BOXES TYPE

- 1DTA-170 W
- 1MG-76/76
- 2MG-186W/2PT0
- K-63/63 S
- 1MG-103W/1PTO
- S2,S3,S4 S4*
- 1MG-103

DEFENCE

- MISSILE LAUNCHER S FOR ROAD RAIL AIR BORNE UNDER WATER
- ROCKET MOTOR CASING FOR MISSILES SUCH AS AKASH, AGNI ASTRA, RUDRAM ETC.
- RADAR ANTENNA

NUCLEAR

- END SHIELD
- CALANDRIA
- MODERATOR HEAT EXCHANGER
- SODIUM TO AIR HEAT EXCHANGER

AEROSPACE

- FLIGHT HARDWARE FOR SSLV, PSLV, GSLV, LVM MK III.
- COMPOSITE NOZZLE LINER FOR PSLV, GSLV AND CJM
- WIND TUNNEL SUBASSEMBLIES

Wartsila India Pvt Ltd

Marine Business - Equipment / Services

Wartsila Naval Equipment Portfolio:

- CPP, FPP, Shafting and Propulsion System Integration
- Waterjets
- Main propulsion Engines
- Gearboxes
- Diesel Alternators
- Thrusters
- Seals & Bearings
- Dynamic Positioning System
- Waste and Fresh Water Systemsetc

Wartsila is a global leader in innovative technologies and services shaping the decarbonisation of marine and energy. With approximately 6.5 billion euros in sales and 18,300 employees across 77 countries, the Wärtsilä strategy focuses on helping customers to continuously improve their environmental and economic performance.

In marine, Wartsila is a global pioneer in power, propulsion, digital, and lifecycle solutions, helping our customers navigate decarbonisation with confidence. Wartsila has been a leading supplier for silent propulsion machinery for different vessel types for over 30 years.

Certifications:

OHSAS 45001) -10000431610-MSC-FINAS-FIN (01 Apr 2024 - 31 Dec 2026)QMS ISO9001-10000431612-MSC-FINAS-FIN (01 Apr 2024 - 31 Dec 2026)ENV MANAG -ISO14001-10000431611-MSC-FINAS-FIN (01 Apr 2024 - 31 Dec 2026)

Propellers, shafting

Propellers, shafting Wärtsilä Controllable Pitch (WCP) propeller systems provide excellent performance, manoeuvrability and are recommended for vessels with frequent sailing routes that involve multiple operating conditions including shock and noise requirements for naval platforms. WCP can also be applicable for vessels that encounter varying weather conditions or demanding operational requirements such as dynamic positioning or ICE covered waters.
Indigenisation through local partners is available for the equipment.

Propulsion Engines

Wärtsilä medium-speed 4 -stroke marine engines are based on the reliable and proven Wärtsilä modular technology platform. These engines are available in various models with W20, W25, W31, W32, W46 in inline and V cylinder configurations, with a power output ranging from 800 kW to 20000 kW as a diesel engineand also in multi fuel engines. The engines can meet demanding shock and noise requirements for naval platforms.
For further details, please look into online product catalogues.

DG Sets

Wärtsilä medium-speed 4-stroke diesel generating sets are based on the reliable and proven Wärtsilä modular technology platform. These are available in various models with W20, W25, W31, W32, W46 in inline and V cylinder configuration engines, with a power output ranging from 800 kW to 20000 kWfor diesel fuel engines. The DG sets can meet demanding shock and noise requirements for naval platforms.
For further details, please look into online product catalogues.
High local content for most models.

Waterjets

Wartsila waterjets designs are available in a steering/reversing (SR), reversing only (R) and booster execution (B) from 1800 kW to 33000 kW power range. On request we can supply designs for special applications giving for instance thrust in all directions, 360°.We are also able to offer shock compliant installations specific for each application. The key benefit of the axial technology will be valid for all executions.

High local content for most models.

Reduction Gears

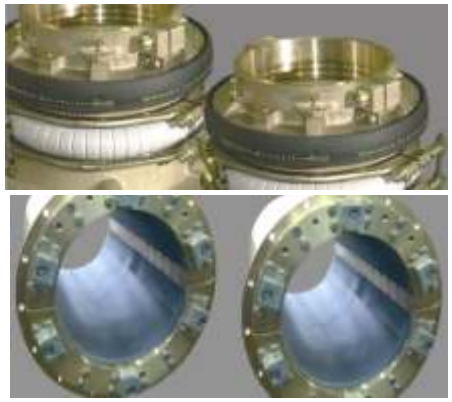
- Gear boxes in power range 800 kW to 22 MW are offered with:
- Modular and flexible design
- Compact and reliable
- Optimum propeller speed for any engine
- CP propeller combination
- Optional PTO/PTI solutions
- Optional built-in multiple plate type of clutch
- Combined oil system for gear and CP propeller
- For further details, please look into online product catalogues

Thrusters

Wärtsilä steerable thrusters (900 to 3200 kW) are available in different series covering a wide range of customer needs. Specific configurations, such as the retractable thruster and underwater mountable thruster series (1000 kW to 6500 kW), are based on the reliable designs of the standard steerable thruster series. Together they form a steerable thruster range that covers the most advanced ship design options.
For further details, please look into online product catalogues

Seals and Bearings

Water lubricated (face type)
MX Stern Tubes Seals (Full Naval Spec.)
MA/MD Stern Tube Seals (Corvette/OPV) EL Stern Tube Seals (OPV) Bulkhead seals ND Bulkhead Seals
Oil lubricated (lip type):MK2and Environmental Seals
Major supplier of line shaft bearings and stern tube bearings:
High and stable adhesion strength between white metal and base metal (oil lubricated, wear-free white metal lining)
Suitable for all application requirements
Water lubricated composite bearing



Dynamic Positioning System

DPI has more than 25 years of experience providing the most versatile and easy-to-operate vessel control solutions in the industry. Using commercial-off-the-shelf (COTS) equipment, DPI control systems are easy to maintain and offer efficient upgrade paths for extended service life. From simple joystick systems to fully integrated vessel control systems incorporating class 3 dynamic positioning, thruster control and vessel and power management, our systems can meet your requirements.
